Lancaster Farming

VOL. 15 NO 12 | Lancaster Farming, Saturday, February 14, 1970 | $2.00 Per Year

New directors of Lancaster County Agricultural and Home Economics Extension Association. (Front row left to right): Mrs. J Stanley Stauffer, Jr and J Harold Frey (Back row) J Glenn Wissler and Ellis R Denlinger Not present was J Wade Groff

Extension Association Honors Dr. Eshleman; Elects Five Directors

One hundred eighty nine people attended the annual dinner meeting of the Lancaster County Agricultural and Home Economics Extension Association Tuesday night at the Farm and Home Center

Carl B Herr President of the Board of Directors acted as toastmaster and another board member James G Kreider gave the invocation

The highlight of the meeting was the election of five directors The county is divided into five districts and elected for a three year term to serve their respective districts were Northwest — J Harold Frey, Manetta R 1 Northeast — J Glenn Wissler, Ephrata R 1, Southwest — J Wade Groff, 644 Beaver Valley Pike, Lancaster, Southeast — Ellis R Denlinger, Gordonville R 1, and Southern — Mrs J Stanley Stauffer Jr

During the business meeting Mrs Edna E Buckwalter read the minutes of the 1969 annual meeting and the treasurer, Melvin G Rohrer, reported An auditors report was given by Roy Book and the nominating committee's report by C Warren Leininger Jason Weaver served as chairman of tellers for election of directors

The newly organized Lancaster Co Farm Womens thirty-two member chorus directed by Mrs Scott Nissley and accompanied by Mrs Wilbur Hostetter, East Petersburg, sang old time favorites including Silver Moon", 'Come To The Fair" and 'Just A Cottage Small' They concluded by singing "The Farm Women's Song" and the State Farm Women's theme song 'Brighten The Corner."

Staff Reports

County Commissioners Benjamin F Weaver, Abram Dombach and Paul Yarnall were among the honored guests

The County Extension staff M M Smith Victor Plastow, Arnold G Lueck Jay W Irwin, Mrs Doris W Thomas and Miss Mary Rosenberger prepared a very outstanding list of activities for the past year It indicated how many people are reached by the services There included 12,934 cases of individual assistance either by personal visits or advice over the telephone, 491 newspaper articles, 578 radio broadcasts, 30 television programs, 333 circular letters written and distributed to 104,004 people, 8 training meetings with 112 leaders in attendance, 433

New Inspection Standards For Meat & Poultry Adopted By State

The Pennsylvania Department of Agriculture this week announced that it has adopted Federal Meat and Poultry Regulations in the state's meat, poultry and food inspection programs

The move was made to establish uniform inspection standards that will not hamper processors and packers nor restrict interstate trade of meat and poultry products State Agriculture Secretary Leland H Bull said The new standards replace state regulations that had governed the processing, packing and sale of meat and poultry products in Pennsylvania In effect he added, differences no longer exist between federal and state regulations pertaining to these products

"We have taken this step reluctantly," Secretary Bull said "because, in our opinion our state regulations were more stringent and afforded a greater degree of consumer protection than is possible with Federal regulations

"We have urged federal authorities to review these regulations and have recommended changes that we feel will be in the best interests of both consumers and the meat industry throughout the nation"

Secretary Bull pointed out that coloring, for example, now may be used in processed meat products such as frankfurters, although it previously had been banned under State regulations

Garden Spot YF Banquet Next Friday

The Garden Spot Young Farmers annual banquet will be held Friday February 20, at the Blue Ball Fire Hall at 6 45 p m

All corn contest participants are urged to attend Entertainment will be provided by Glenn Eshelman

Pickle Co. Needs More Growers

The Oxford Pickle Company held a meeting Thursday with potential growers Harvey Good of the Plant Food Store, Intercourse, said about forty farmers attended many of which were new growers

The company intends to take up to 150 acres this year and 90 acres were committed at the meeting About half of the farmers committing acreage were growers last year

The company announced an increase in price of 5% or $1.26 a bushel to those farmers that grew last year New growers this year will receive the same price as last year or $1 20 a bushel

Zane Wilson

Wilson Named Editor Of Lanc. Farming

Zane Wilson, of 530 Golden St, Lititz, has been named managing editor of Lancaster Farming, effective Monday, February 16 Wilson will have complete responsibility for the news side of Lancaster Farming

He succeeds Everett R Newswanger, who has taken a position with Grant Heilman, photographer, located in Lititz

Wilson has a farm background and has been involved in many areas of news reporting in addition to farming He started his journalism career in 1959 on his high school newspaper

Since May 1966 he has been a staff writer for the Lancaster New Era

He previously was a reporter for the Charleston (W Va) Daily Mail and Springfield (Ohio) Sun

A native of West Virginia, where agriculture outranks 'King Coal" in business volume, Wilson received a BS degree from the West Virginia University School of Journalism with a minor in political science in 1965

He graduated from Romney High School in Hampshire Coun-

COWS

February 11, 1970

Receipts of 92 cows and 1 bull

Local Grain Prices

These prices are made up of the average prices quoted by six participating local feed and grain concerns It should be noted, however, that not every dealer handles each commodity. All prices are per bushel except for ear corn which is per ton.

The average local grain prices quoted Thursday, February 12, 1970 are as follows

	Bid	Offered
Corn (ear)	$37.66	$42 00
Corn (shelled)	1 45	1.57
Oats	74	.84
Barley	1 15	1 34
Wheat	1 45	1 66

Bid is the price the dealer will buy from the farmer delivered to the mill Offered is the price the dealer will sell for at his mill.

sold steady Holsteins 425-750; Other breeds 285-375; one bull 385.

HORSES

February 9, 1970

Weekly Poultry Report

Delmarva

Ready-to-cook movement continues spotty ranging light to fair due in part to much of the New York Market being closed in observance of Lincoln's Birthday. Less-than-truck-lot prices generally unchanged Advance interest fair at slightly higher prices than this week's levels with early trading ranging 26½-27c. Live supplies ample. Undertone unsettled.

Negotiated trucklot prices 2-3# ready-to-cook broiler/fryers for delivery next week. U.S. Grade A Tfewr; Plant Grade 26½-27c. Pool trucklot (Thursday arrival at terminal markets): U.S Grade A 27-29 M 27½-28c; Plant Grade 26½-27½ M 26½-27c Special packs including 1¾-2, 3½# sizes Tfewr.

Eastern Pennsylvania And New Jersey

Prices unchanged to ¼c higher on light type hens. Demand fairly good for generally light offerings. Trade advices indicate producers holding for further production or in instances recycling birds that they were unable to move a month ago, when plants were operating at capacity Offerings of heavy type hens limited but adequate for a light demand. Light Type Hens 8½-11¾ M 11¼-11½ in Pa. mostly 9½-10 in New Jersey. Heavy type hens Tfewr.

Fogelsville

February 10, 1970

(Prices paid dock weights, cents per lb, except where noted)

HENS, heavy type 9-27½ mostly 15-20; PULLETS 28½-33; ROASTERS 21-42 mostly 30-36; CAPONS 36½-38½; DUCKS 19-38 mostly 30 38; DRAKES 11-50 mostly 37-42, RABBITS 25-55 mosdy 40-50; GUINEAS 80½-85, PIGEONS (per pair) $1.25-$2 45 mostly $1 25- $1.50.

TOTAL COOPS SOLD: 568.

MORE HOGS AND PIGS

The number of hogs and pigs on Pennsylvania farms on December 1, 1969 was 613,000, an increase of 12 percent from the 547,000 on hand December 1, 1968 The December 1 inventory value of hogs and pigs was $22,804,000 in 1969 compared with $18,160,000 in 1968.

The 1969 fall pig crop in Pennsylvania totaled 408,000 — an increase of 9 percent from June-November production in 1968 The number of sows farrowed, 53,000, was up 6 percent from a year earlier while pigs per litter increased from 7 5 in 1968 to 7.7 for the 1969 fall crop. The 1969 spring crop of 456,000 pigs was up 12 percent from 408,000 from the previous spring. Pigs per litter for the December 1968-May 1969 period averaged 8 0, up .3 from a year earlier Sows to farrow December 1, 1969 through May 1970 is estimated at 62,000 an increase of 9 percent from 1969 spring farrowings.

County Gets $39,344. From Pa. Fair Fund

The State Agriculture Department Wednesday announced distribution of more than $1 4 million from the Pennsylvania Fair Fund to county and local fairs, youth activity groups and statewide farm organizations.

The total topped the previous year's disbursement by $67,163.-91, State Agriculture Secretary Leland H. Bull said. The money is derived from state harness racing income last year.

County and local fairs received a total of $1,131,093, with an additional $39,924 going to statewide organizations. A total of $232,685 went to youth groups, with 4-H receiving $138,609, and FFA receiving $94,075.

Disbursements in Lancaster County totaled $39,344.87 to: Ephrata Fair, $8,573.81; Manheim Community Farm Show, $7,528 88; New Holland Farmers Fair, $3,090 93; Southern Lancaster County Fair, $3,123 00; West Lampeter Community Fair, $3,522 25; FFA Association, $2,000 00, 4-H Development Fund, $4,048 00; Pennsylvania Sheep and Wool Growers Association, $2,458 00.

Unusual bleeding or discharge may not mean cancer. But only your physician can tell for sure If the condition continues for two weeks, see him, says the American Cancer Society.

Crucial Test

Uterine cancer is curable in almost 100 percent of cases if diagnosed early The Pap test makes early detection possible. The American Cancer Society urges every women to have a Pap test as part of a regular health checkup.

One of the greatest boons of dieting is the pleasure experienced when you junk the whole program for some noholds barred eating.

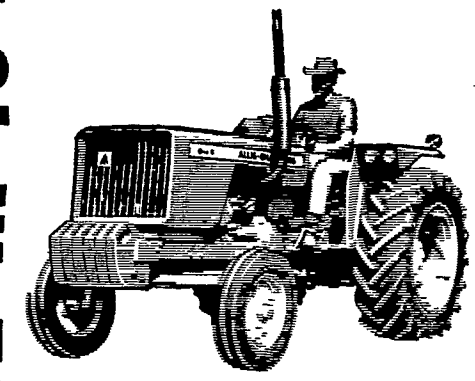
*** NEW FIRST CHOICE IN 40 HP TRACTORS!**



ALLIS-CHALMERS ONE-SIXTY

POWER for the man on the grow—that's the new Allis-Chalmers One-Sixty.

Covers a lot of acres fast when you're getting a seedbed ready, or creeps along for transplanting seedlings or cultivating young, tender crops.

- 3-cylinder diesel engine—40 horsepower* strong.
- 10 forward speeds.
- Differential lock for extra pull in the tough spots.
- Fast-acting hydraulic system for precise implement control.
- Short wheelbase and tight turning radius.
- Power steering.

Come in soon and see the new Allis-Chalmers One-Sixty . . . see why a 40 horsepower* tractor doesn't have to be underweight. Going Orange is Going Great!

From Where We Stand...

Filling The Gap

The "generation gap" may not be as wide as many people hereabouts think. According to a recent authoritative opinion survey, adults and teen-agers agree on a number of important points concerning college student demonstrations. Both teen-agers and adults think that the colleges have been "too easy" on student demonstrators. Teen-agers and adults agree in the belief that the demonstrators are breaking the law. A substantial percentage of both teen-agers and adults believe that law-breaking student demonstrators should be taken to court. Both teen-agers and adults also agree to a substantial extent that demonstrations are the work of small groups of trouble-makers on campus. The draft and opposition to the Viet Nam war are seen by teen-agers and adults alike as primary causes of student demonstrations. Adults and teen-agers differ in the matter of whether students should have more say concerning the academic side of colleges. The majority of teen-agers would like more control over courses, examinations and so forth, while a majority of adults believe otherwise.

Perhaps the gap of understanding between youth and adult is not as wide as has been popularly assumed. The fact is that each generation faces many unknowns, and so far each has met the test and has contributed to the growing strength and well-being of the nation.

Where Are The Customers?

News stories have described disastrous electric power shortages in Yugoslavia. Now a press dispatch from Berlin tells of shortages of power in East Germany. The dispatch recounts how an East German newscaster opened his program instructing all householders to shut off lights and electric appliances for a period of three minutes as an appeal to East German citizens to conserve electricity.

The interesting point about these stories is that nowhere in them are there any indications of organized citizen protest, investigations or "Congressional" hearings. In communist countries, customers of the government-owned power system are mute. There is no place they can turn to voice protest against a government monopoly. Consequently, wire service dispatches telling of the power troubles in dictator-ridden countries hold a common buck-passing theme in which the pattern is always the same. One group in the political hierarchy blames another, and eventually a few heads may roll and that is the end of the matter.

The first reaction on reading these stories when they arrive in this area is one of bewilderment — where are the customers and their spokesmen? The answer is simple. In communist nations there is no Public Utilities Commission to speak for customers. If the state wishes to increase power rates, it does so by decree. This is in sharp contrast to the United States where an application by an investor-owned, taxpaying electric company for a rate increase is followed by exhaustive hearings, after which the increase may or may not be granted to the so-called "private" company.

Local Weather Forecast

(From the U. S. Weather Bureau at the Harrisburg State Airport)

Saturday (today) will be fair and cold with temperatures between 24 to 30. Sunday, not as cold. Chance of snow or rain Sunday. Temperatures moderating Monday and Tuesday with the lows between 5 and 20 and the highs between 20 and 30. Possibility of snow Monday and Tuesday.

WASHINGTON REPORT

Congressman Edwin D. Eshleman

16th District—Pennsylvania

The pollution issue has become one of the major concerns on the national front and justifiably so We must deal with our environmental crisis now or face extreme consequences in the very near future The problems are far-reaching While many commentators and politicians are talking about the pollution of our air and water, I like to add another area to my personal list — food pollution If you put those three areas together and resolve to come up with solutions. you will have what I call the 'Challenge of the Seventies"

Dealing with the pollution problem is not a deferable item in government business We are poisoning ourselves today with our air water and food When you realize that there are many instances where you can see the air smell the water and be made ill by food, you begin to recognize the extent of the crisis Government action is not only desirable but it is necessary

We might as well face some facts about the environmental crisis from the beginning First. the solutions to the problems are going to be expensive Second, there are no easy answers to curbing pollution and we are all going to be affected by the actions needed to save our environment and our health

The expense connected with conquering pollution is impossible to calculate exactly except to say that the cost will be high I would hope that the programs adopted by the government will not be so unimaginative as to just pass the bill along to the taxpayer I would prefer to see the government take primarily a regulative role which will direct a large part of the anti-pollution costs to those responsible for the problem For example, since the automobile contributes so greatly to the air pollution problem, the auto manufacturers should be required by government to clean up the exhaust of their product Of course, the man who buys a car will eventually end up paying for the additional equipment, but that is more fair than adding the cost to the taxpayer's yearly bill I might add regarding this regulative role that all requirements set down should be stiff and should be rigidly enforced.

Easy answers to the pollution problem are non-existent Some people would have you believe that all we have to do is make industries clean things up and all will be well again The facts speak otherwise While our industries do contribute their share to the environmental crisis, the really big polluters are you and me When we drive our car, spray insecticide on our flowers, turn on our electric lights. use our garbage disposal or one of hundreds of other everyday things, we contribute to air, water and food pollution

The answers to curbing the crisis therefore will involve some regulations on each of us, and in some cases we may not like the result We may have to drive lower-powered cars because high powered engines spew out a disproportionate amount of pollutants Our use of electrical power may be curbed since big power plants can contribute greatly to all and/or water pollution The more electricity used the more power plants that must be built to handle the increased loads Again the list of items can be endless, but you get the idea

In the final analysis reclaiming our environment is a matter of survival Yours and my great grandchildren will be the benefactors if we take the necessary steps toward curbing pollution now They will also be the victims if we find the solutions too bitter and permit air, water and food pollution to continue unchecked.

THE BIBLE SPEAKS

International Uniform Sunday School Lessons

BY LAWRENCE W. ALTHOUSE

GOD'S WILL

Lesson for February 15, 1970

Background Scripture: Deuteronomy 26 5 11; Matthew 8 5 17 Luke 6 26 36 Acts 16 25 40. Devotional Reading: Psalms 78.1 8.

The words of Jesus deeply moved many who heard him. Yet it was more than words that won men to him. For, in addition to the words, there were also the mighty acts he performed.

One such incident was the healing of the centurian's servant (Matthew 8.5-13). We all know the story, yet many of us have probably never considered deeply the implications of this "mighty act" of Jesus. When we look at it carefully, it may have some surprises for us.

Rev. Althouse

The unlikely candidate

For one thing, when you think of it, the centurian is a rather unlikely candidate for a healing miracle. He was not a Jew. It is unlikely that he shared any religious beliefs with Jesus. Since he was not a Jew, he could hardly have looked to Jesus as the Messiah. Actually, as a Roman soldier, he was even considered an enemy.

An avowed agnostic once came to me saying, "I'm not a Christian and I don't know that I believe in God, yet if you would pray for my wife, I would deeply appreciate it." He too seemed an unlikely candidate to ask something from God, yet I remembered that it was often people like this to whom Jesus responded with his mighty acts. God will not be limited by the lines which men draw.

Secondly, although the man did not share Jewish beliefs, he obviously believed in Jesus. That is, he was convinced that Jesus had the power to perform a mighty act of healing. Whether he was the Messiah, the Son of God, or a prophet was not important to him. The important thing was his trust in Jesus and his authority.

Once again, this may strike us as surprising. Some of us may have the idea that the secret of prayer is to hold the "right" theology or know the "right" method. Yet, as Jesus demonstrated repeatedly in the gospels, it is more important for a man to respond to Jesus with a personal trust in his authority and power.

No limitations

Third, it was not necessary for Jesus to see and touch the centurian's servant. Jesus was quite willing to go to the commander's home, but the Roman realized that Jesus's authority was not limited by time and space. It was not hocus-pocus or sleight-of-hand that Jesus performed in his healing ministry. Jesus, the centurian perceived, was a man who possessed authority over the welfare of men's bodies. He likened Jesus's acts of healing to the military orders which he gave to his Roman subordinates.

Even today we find that the power of God is not limited by dimensions of time and space. Thousands of miles may separate someone who is ill or in difficulty and a small group of concerned people who pray for that person, but the power of God may be released just as powerfully as if they were in the same room.

No doubts

Finally, we note that Jesus did not hesitate to heal the servant. He did not say to the centurian, "I'm sorry, you are not worthy to make such a request of me," or "Just accept this sickness, it is God's punishment for your pagan faith," or "Don't worry, this illness will be good for your servant: it will help him grow spiritually," or "Too bad, it's not God's will for him to be healed." Nor, you will find, did Jesus ever say these things to anyone who came to him! I defy you to find one instance in which Jesus refused healing to anyone. Show me one place in the gospels where he says, "Lord, if it be thy will, heal this person"!

You will not find any such passages, for obviously, it is not God's will to withhold healing. As in Nazareth, where he could do "no mighty works because of their unbelief," men can sometimes thwart that will; but Jesus never doubted what God desired for men.

To Plan For Wheat Fertilizer

The topdressing of winter wheat with nitrogen fertilizer about the middle of March is a good practice to increase both grain and straw yields Growers who have wheat on poor soil, or on sand shale, or gravel, this extra application of straight nitrogen should increase yields The use of 40 to 50 pounds of actual nitrogen per acre on wheat not to be seeded down is recommended with wheat that is also to be a nurse crop, the amounts should be reduced to about half this rate When growth begins in the spring would be a good time to make this application

To Prune Grape Vines

Many rural homes have several grape vines in the landscape To bear the most fruit these vines should be pruned when the plants are dormant Pruning during the next month will reduce the amount of vines and help mature the crop that is to come.

To Give Attention To Ewe Flock

The care of the ewe flock is most critical during the last six weeks before lambing time She should be fed top quality legume hay along with one-half to a pound of grain per day, plus daily outside exercise If these items are lacking the ewe may develop ketosis which is a nutritional disease when the feed is not furnishing the body needs Special care at this time of the year will help produce a more profitable lamb crop.

WHO CARES

—when you have trouble with your flock?

—when feed efficiency drops, or egg quality tumbles?

—when disease strikes unexpectedly?

—when you can't make the profit to which you are entitled as an agribusinessman?

WE CARE!

And We'll Go Out Of Our Way To Prove It!

"FINEST SERVICE ANYWHERE"

USDA Fixes 1970 Program For Soybeans

The U S Department of Agriculture today announced it price support loan levels fo soybeans a reseal loan progra for soybeans and sales policie for CCC owned stocks of soy beans

Soybeans from the 1970 cro will receive price support at a national average of $2 25 pe bushel, No 1 grade, 12 8-13 percent moisture A level un changed from that in effect fo the 1969 crop

By law, soybeans must be supported at levels that will en able them to compete on equal terms in the market

Producers can receive price support on their 1970 crop soybeans through farm and warehouse-storage loans and pur chases either as individuals o through CCC approved coopera tive marketing associations Price support will be available through county Agricultura Stabilization and Conservatio Service offices Loans will b available through May 31, 1971 Maturity date will be June 30 1971

At the same time, the De partment announced that resea of the 1966 farm stored soybean loans and of the 1967 and 1968 loans on soybeans stored in commercial warehouses will not be extended The 1970 maturity date for 1966 67 68 crops under loan is July 31 The current outlook on market prices is such that producers are unlikely to be able to redeem these extended loans A continuation would cause some administrative difficulty without benefit to producers However, loans on farm-stored soybeans for the 1967, 1968 and 1969 crops can be extended for another year.

The policy of dropping older crops from annual loan extension programs has long been followed by Commodity Credit Corporation as a matter of good management practice. As newer crops become eligible for reseal loans, the older stocks are moved to make room to rotate supplies cntinued in storage.

Commodity Credit Corporation's minimum sales price for CCC soybeans for the marketing year beginning Sept, 1, 1970, will be the same as that for the preceding year. It will be a flat 27½ cents per bushel above the 1970 support rate at the point of storage or at the market place whichever is higher. This represents a 10 percent markup on the national average loan rate of $2 25 per bushel plus a 5-cent charge.

The national average CCC minimum sales price will increase at the rate of 1½ cent per month for nine months as shown in the following table for No 1 grade soybeans

September	$2 52½
October	2 54
November	2 55½
December	2 57
January (1971)	2 58½
February	2 60
March	2 61½
April	2 63
May	2 64½
June	2 66
July	2 66
August	2 66

For soybeans in store at positions, the minimum price will be as follows Great Lakes $2 58½ Gulf, $2 64½, East Coast, $2 65½ These prices will be increased by 1½ cents per month beginning in October and continuing through June Prices on stocks in interior terminals can be obtained from the Kansas City Commodity Office.

Correspondence Courses

It's Home Improvement Time

It's Spring! Almost — and that means home improvement time Your plan may be as simple as a fresh coat of paint or as elaborate as a plan for remodeling Whatever your plans are for making home improvements, you'll want to know the right way to avoid costly mistakes

Two courses to guide you in making improvements around your home are available from The Pennsylvania State University One course titled Improving House and Grounds gives practical ideas for making homes more livable and home grounds more attractive In addition to a discussion on remodeling and seven steps to more beautiful home grounds efficient planning of bathroom, kitchen, and storage areas is discussed The course sells for $2 65

The other course is House Furnishings and begins with a discussion on planning It continues with color, texture arrangement, lighting, windows, accessories and carpet and rugs This course sells for $3 45

If bought together, you may have both courses for $5 50 You'll want to study both courses, if you plan to redecorate, remodel, or add furnishings to your home Make check or money order payable to Penn State and send to Home Improvement Box 5000 University Park, Pennsylvania 16802

Chair Caning

Chair caning is a hobby you might like to investigate You can learn to repair your own cane-seated chairs and save money, according to specialists with the Cooperative Extension Service of The Pennsylvania State University At the same time you'll have the satisfaction of doing something different and having fun doing it

Also you could become so skilled at repairing your own chairs that you'd be interested in caning for others and thus develop some income

To learn the principles of chair caning, you can study the well-illustrated guide book titled, "Repairing Chair Seats With Cane" It's available for a small fee from The Pennsylvania State University

For a copy of the chair caning booklet with easy to-follow and complete instructions, send your name and address with 25 cents plus six percent Pennsylvania sales tax to CHAIRS, Box 6000, University Park, Pa 16802 Your copy will be mailed promptly

---

At this time of the year many little pigs and lambs are being born on our farms It is very important to provide dry, warm, and draft free quarters for these young animals for the first several days, for the little pig, it is best to give them special care for several weeks because they cannot adjust to cold, damp quarters as rapidly as the lamb or the new-born calf If there is not any supplemental heat in the barn at the time of birth, the use of heat lamps in the restricted pen or area is strongly recommended Be sure the lamp is securely fastened so that it will not fall into the bedding, and be certain that the animal cannot get to the lamp or the electric wires to the lamp Special care at this time of the year will end with greater net returns on the enterprise

County Farm Women Hold Board Meeting

Following a recent meeting of the executive board of the Society of Farm Women of Lancaster County, it was announced that Mrs Glenn Myer, Kirkwood, second vice president, has been appointed to replace Mrs E. Robert Nolt, who recently resigned, as representative to the Farm and Home Center board of directors.

RESOLUTIONS

During an evaluation of the State Convention, Mrs John N. Hess, County president, suggested that each Society send a copy of the adopted resolutions, with the members' signatures, to state representatives to inform them of the stand taken by the Farm Women of Pennsylvania

Resolutions emphasized conservation of natural and historical resources, patriotism, drug abuse and concerns about food and nutritional deficiencies caused by elimination of natural substances in some foods by the manufacturing processes

Each of the 30 county societies, comprising approximately 1,000 members, is to try to apply these resolutions in the local situation

The board is considering the Conestoga Valley Association along with the Mental Heath Society as the county project for next year. A definite decision will be made at the next meeting in April.

Mrs. Hess was given a vote of confidence for making immediate decisions on behalf of the Society when time does not permit an executive session In the future, emergency requests will be handled with the support of the executive board, after verification

Mrs Nolt Mental Health chairman, reported that 160 pairs of socks were purchased for patients at Embreeville State Hospital with the sum of $265 00 given by society members The remaining $18 00 will be placed in the Lancaster County fund for recreation use

The 53rd annual convention of the Society of Farm Women of Lancaster County is scheduled for Nov. 7. Serving on the program committee are Mrs Aaron Denlinger, Society 7, chairman; Mrs. Scott Garman, 11, Mrs. William Heisey, 8; Mrs Elam Hess, 20, and Mrs Jack Henderson, 25.

The problem of large amounts of snow on house and barn roofs this Winter has been quite common; as this melts and then refreezes, the eve trough and spouts get full of ice, with ice dams also on the roof. When further thawing occurs, water may be backed up under the shingles and into the interior of the house. When this condition is present, it is very difficult to do much about it at the time except to try and open some of the roof dams However, a well insulated house will reduce the amount of roof thawing and therefore, less ice Also, the use of electric heating cable placed along the edge of the roof and in the trough, will melt channels through which the melting snow can escape This cable needs to be energized only when the ice forms after a thawing day.

4-H Club Activities

by Dudly Rohrer

The Central 4-H Tractor Club held its third meeting Tuesday evening, Feb. 10 at Landis Bros., Inc., Lancaster.

Three demonstrations were given by members of the club. They were: Roger Pherrien on power-take-off and why you should always have shields covering PTO; Ed Leaman on the reason for having an air cleaner and Lynn Royer on proper fuel mixture.

Two new members joined the club at the meeting.

The next meeting will be held Tuesday, Feb. 17, at 7.30 at Landis Bros

Robert Bucher Named Ag Officer At Commonwealth Bank

John C. Peck, vice chairman of The Commonwealth National Bank, recently announced that Robert P. Bucher was named agricultural relations officer.

Bucher, 325 Sunset Avenue, Strasburg, is a graduate of the Solanco School District. He attended Penn State University, where he majored in Agricultural Economics.

Anchor In Art

Among the earliest of Christian symbols, used on catacombs and on ancient gems, the anchor is used in religious art as an emblem of steadfast hope and untiring patience.

Local Water Problems Meeting Next Tuesday

The need for flood prevention, water supply, recreation and conservation in Lancaster County and five other southeastern Pennsylvania counties will be outlined by the USDA at 7 30 p.m. Tuesday at the Lebanon County Courthouse.

Other counties to be covered include Lebanon, Chester, Dauphin, Berks and Schuylkill, in a regional session.

Major resource problems to be covered include inadequate water supplies, stream pollution, poor land use and a shortage of recreation areas.

Local water needs, trends in agriculture, population growth and the impact of recreational developments also will be discussed

Wheat And Feed Grain Meeting Mon.

The Agricultural Stabilization & Conservation Service, Lancaster, announces a meeting to explain the 1970 Wheat and Feed Grain programs will be held Monday, February 16 at 7:30 p.m. in the Farm and Home Center.

All farmers and other interested persons are invited to attend and learn the details of the wheat and grain programs

Farmers with a Feed Grain base (corn, barley and grain sorghum) can earn price support and/or diversion payments by enrolling in the feed grain program.

Minimum diversion is 20% of the base and maximum diversion is the largest of 25 acres, or 50% of the base, not to exceed total base. Farms with base of 25 acres or less, earn diversion payment on the minimum ,and all farms on acreage diverted in excess of the minimum. Price support payment is earned on planted feed grain, up to 50% of the base.

Wheat farmers can earn certificate payment on wheat planted for harvest up to 48% of the allotment, by diverting an acreage equal to 30.3% of the allotment. They can also earn diversion payment on any part of the allotment not planted to wheat Maximum wheat diversion is the larger of 50% of the allotment, or the difference between 25 acres and 30 3% of the alotment, not to exceed the allotment

Farmers enrolled in either program must maintain the conserving base established for the farm, and must plant within the applicable base or allotment on all other farms in which they have an interest.

Diverted acreage must be eligible cropland No crop can be harvested, and acreage cannot be pastured between March 31 and September 1

Final date to enroll is MARCH 20 Farmers are encouraged to enroll early and avoid the last minute rush

● Manheim

(Continued from Page 1)

room. It will start Tuesday, February 17, at 7:30 p.m. and will continue each week for five weeks. Anyone who did not already register can do so the first evening. The course deals with Farm Mapping, Soil and Water Conservation, and Field Fertility Management.

A course on Electric Motor and Automatic Control will be taught by Mark Campbell, vocational agriculture teacher at Manheim Central high school. This course will begin Thursday, February 19, and run for ten weeks The cost is $10 00 Registrations must be made before Thursday by calling the high school Vo-Ag. Department.

The farmers were also reminded of The Hazardous Occupations of Farm Youth law which makes it imperative that you do not hire boys under 16 and allow them to work on and around power equipment. A course will be offered to get boys certified in this area, starting March 1st.

Chester Co. Dairy Day Next Thursday

Robert A. Powers, Jr. Chester County Agricultural Agent, announces a Dairy Day to be held Thursday, February 19, at the Sadsburyville Fire Hall, Sadsburyville.

The program will consist of 10:00 A.M.—Movie on "Freeze Branding", a new way to identify dairy cattle, "Improved Milking Techniques", Stephen Spencer, Penn State Dairy Specialist; "Organizing the Dairy Farm for Maximum Profit", Samuel Dum, Penn State Farm Management Specialist, Noon—Lunch (courtesy of Atlantic Breeders') 1 00 P.M.—Atlantic Breeders' meeting, 2 30 P.M.—Adjournment.

Thirty years ago, fewer than one-in-five was being saved from cancer: today the American Cancer Society reports, it is one-in-three It could be one in two with early detection and prompt treatment

● Wilson Named

(Continued from Page 1)

ty, W. Va., in 1961. During high school and college, he worked part-time and several summers for the Hampshire Review.

During four years at Romney High School, Wilson was in the vocational agriculture program He was reporter, parliamentarian and president of his chapter of FFA, as well as a federation officer.

In 1961, he won his local, federation and area FFA public speaking contests and entered the state contest on the subject, "Why Government Should Get Out of Agriculture."

The new managing editor is married to the former Patricia Cavanaugh of Lancaster They have two children Mary Elaine, three, and Diane Elizabeth, one

Wilson is the son of Mr and Mrs. George H Wilson, who reside at 88 Diller Ave., New Holland

Mrs Wilson, a former reporter on the New Era's society page and a Millersville State College graduate, is the daughter of Prof and Mrs. John Cavanaugh of Long Apartments, 221 Race Ave., Lancaster.

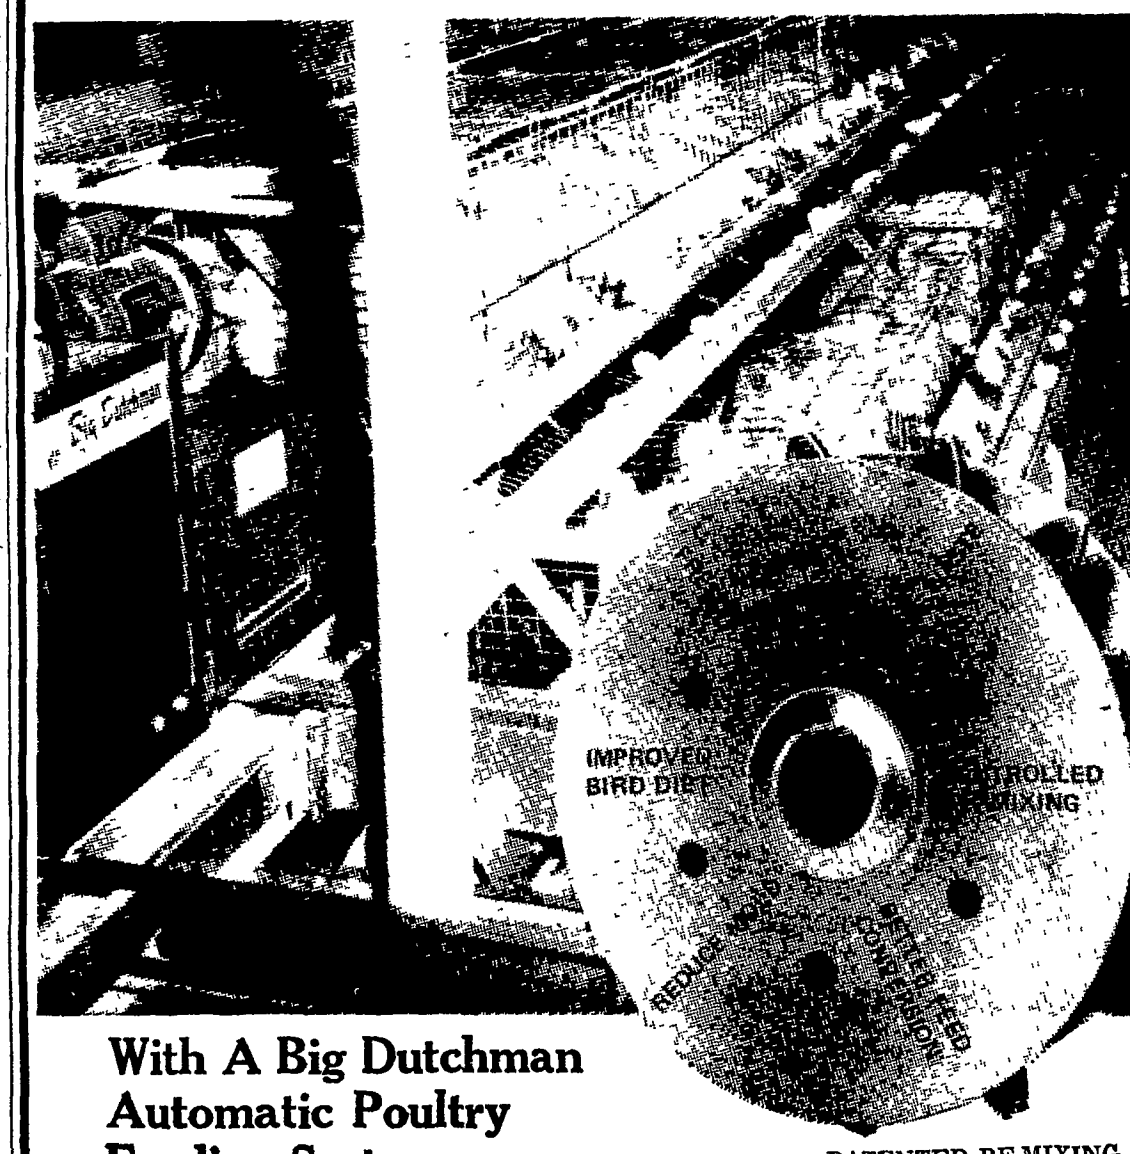
GET MORE FOR YOUR MONEY



With A Big Dutchman Automatic Poultry Feeding System

PATENTED RE-MIXING INTAKE WHEEL

You get more eggs from your feed dollar because our exclusive, patented re-mixing intake wheel in the feed hopper re-mixes uneaten feed returning from the trough with fresh feed. That means all of the feed is used. Your birds get the full ration, and feed is not wasted. The result is better feed conversion.

The Big Dutchman chain-in-trough feeding circuit strengthens this benefit by "carrying" the whole feed to the birds. Feed is not dragged or forced by any mechanism that has a grinding, separating action.

These are real advantages that give you more out of the feed you buy, and more out of the hens you feed. For more information on money-saving layer cages and feeding systems see your nearest Big Dutchman representative or write:

● Extension

(Continued from Page 1)

meetings conducted by the leaders and attended by 10,896. There were 72 program planning meetings with an attendance of 620. 35,612 attended 697 Extension staff meetings. Other meetings the staff attended reached 34,680 people. There were 77 4-H clubs functioning last year with a total of 2,024 boys and girls participating in 2410 projects. 322 4-H Leaders were largely responsible for carrying on the work of these clubs under the direction of the County Extension workers

Mrs. Doris Thomas reported that the Extension service has served Lancaster County for 57 years. The interest in workshops has increased to the point that six teachers had to be hired the past year to help conduct them and a small charge was made for attendance in order to serve everyone. All the workshops were conducted in the Farm and Home Center. They will be reaching 20,000 fourth and fifth graders this year through TV on Saturday afternoons, stimulating 4-H work.

Victor Plastow listed several meetings of interest particularly to farmers for February and March. He said DDT and 2-4-5T (brush killer) herbicide have been banned due to their chemical carry-over qualities and cautioned farmers that a new federal Child Labor Law prevents a boy or girl from 14 to 16 years of age from driving a tractor on a neighbors farm unless they have a card of certification to do so He stated that Lancaster County has the largest 4-H enrollment in the state They have 10% less Extension workers in the state than ten years ago Last year the federal government provided funds for work in foods and nutrition in low income communities of 20 counties and will provide greater funds this year.

Robert F. Eshleman, Ph. D., left, Mount Joy receives the 4-H Alumni Recognition Award from Jay Irwin, associate county agent.

4-H Award

Jay Irwin presented Dr Robert F Eshleman with the State 4-H Alumni Recognition plaque for 1969 This is conducted by the Cooperative Extension Service and the plaque is made available by Olin Mathieson Chemical Corporation Candidates are selected by the Pennsylvania State University Extension Service Dr Eshleman is Professor of Sociology at Franklin and Marshall College This year he is on leave and is a visiting research fellow at the University of Glasgow, Scotland He had six years experience in 4 H work in Lancaster County and was cited for his continuing work with youth and education, having served in many capacities locally and internationally.

Mr. and Mrs Robert C. Groff, Quarryville R 3, Mr and Mrs. Robert Kauffman, Elizabethtown R 1 and Mr. and Mrs Arthur W. Longenecker, Drumore R.1 were recognized for hosting IFY students

Dr William H. Duncan, President of Millersville State College, for the past one and half years spoke on the topic "Public Higher Education In The Commonwealth of Pa And Who It Serves" He referred to four areas our tax money is used to support. 1—13 State Colleges and 1 University owned, maintained and operated by the State of Pa. 2—State related colleges: University of Pittsburg, Temple and *Penna State University.* 3—14 or 15 State supported schools which the state helps to support but has no control over And 4—Community Colleges. A fifth area is scholarships and loan grants to students attending college in and out of the state Also the state has a strong privately supported higher education system Presently 5100 students are enrolled at Millersville State College Dr Duncan says "Praise the Lord for the generation gap. We expect change There are threats to our way of life but that is a minority group We have to learn to work with those who are trying to make a change"

KILL RATS and MICE FAST with FERRET ... the great new

breakthrough in Rat and Mouse Control

Fancy packaging and overdrawn claims are aimed at the public, but do not fool rats and mice. To kill rats and mice you need the amazing Ferret Rat and Mouse Killer. Rats find it irresistible, steal the deadly little sack and carry it to their nest. Ferret is used and acclaimed by farmers and feeders coast to coast. Also by stockyards in Chicago, Omaha and Denver. Come in and let us explain how you can achieve perpetual control using Ferret.

MORE CATTLE, FEWER HOGS ON U.S. FARMS

The inventory estimates of livestock and poultry on U.S. farms and ranches show more cattle and calves, chickens and turkeys than a year earlier, but fewer hogs and pigs, and sheep and lambs Cattle and calves on farms and ranches this January 1 are estimated at 112.3 million, up 2 percent from the 109.9 million on hand January 1, 1969. Beef cattle and calves were up 3 percent but dairy cattle and calves declined 2 percent during the year. The 56.7 million hogs and pigs on farms December 1, 1969 is 6 percent less than the 60 6 million on hand a year earlier. All sheep and lambs on hand January 1, 1970 at 20 4 million are 4 percent below a year earlier, continuing a decline in numbers that began in 1961. Stock sheep and lambs declined 4 percent from a year earlier while sheep on feed are down 2 percent. The number of chickens is estimated at 431 5 million, up 3 percent from January 1, 1969 Turkeys are estimated at 6 7 million, up 1 percent from a year earlier

SHEEP DECLINE CONTINUES

Sheep and lambs on Pennsylvania farms at 165,000 on January 1, 1970 were down 3 percent from the 170,000 a year earlier — another new record low. Inventory value at $3,548,000 was up 10 percent from $3,230,000 a year earlier.

1969 GOOD FEED YEAR IN PA.

The 1969 corn production was 76,188,000 bushels, 34 percent more than in 1968, but 6 percent less than the record 1967 crop. Corn silage production of 4,890,000 tons was second highest of record. Oats production of 22,644,000 bushels was 15 percent less than in 1968 with acreage at a record low. Barley production was 9,741,000 bushels — below 1967-1968 levels. Although hay acreage harvested was at a record low, yields were record high and production of 4,146,000 tons largest since 1924.

Cattle numbers as of January 1 were 1 percent less than a year earlier and sheep numbers down 3 percent. The number of chickens advanced 1 percent while turkeys were down 4 percent. As of December 1 hogs on farms were 12 percent above a year earlier.

Biggest problem with "adult" movies is that there are so many kids in the audience that it's hard to find a good seat.

CATTLE NUMBERS DECLINE

Inventory of cattle and calves on Pennsylvania farms January 1, 1970 was 1,781,000 head — down 1 percent from the 1,799,000 on hand a year earlier. Virtually all of the decline was in cattle and calves kept for milk which numbered 1,269,000 compared with 1,286,000 January 1 a year ago. Milk cows two years old and older at 807,000 were 1 percent short of the 815,000 on hand a year earlier. Heifers one to two years of age being kept as replacement stock were also off 1 percent and heifer calves for milk were down 3 percent. Other cattle numbers were about steady — 512,000 compared with 513,000 a year ago. Total value of all cattle and calves on January 1 was $445,250,000 compared with $420,966,000 the previous January 1.

Best Tip Yet

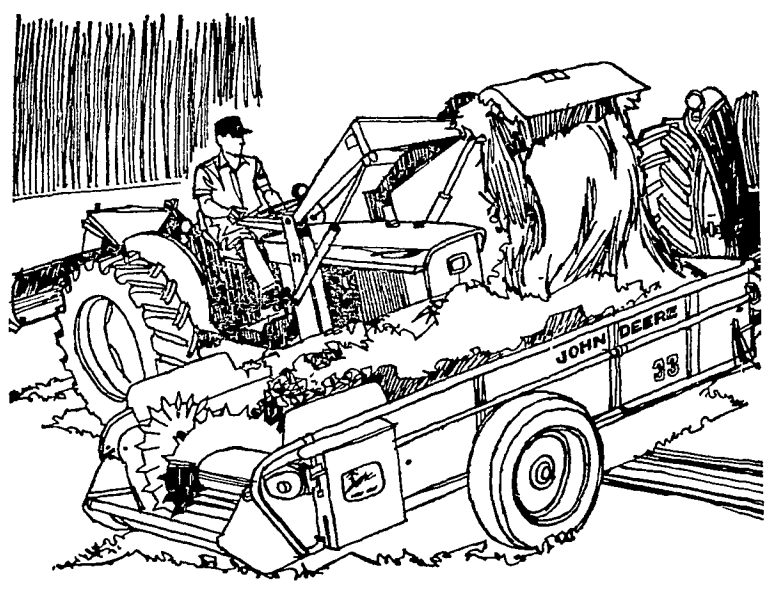
Pick a John Deere 53 h.p. 2020 to make hay, get this bonus...



A feedlot tractor that lets you control traction, shuttle shift, and move tons!

Do you know the "2020" is the only tractor in its class with a 1,000 rpm midpoint PTO and dual-speed rear PTO? Great for haying . . . but beyond that the "2020" provides a mechanical direction-reverser, standard equipment, for shuttle-shift loading. It's available with differential lock for traction control in "swampy" feedlots. And the "2020's" closed-center hydraulic system delivers ample power to hoist one ton per bucket load. It's a lot of tractor considering its competitive price tag. Test-drive one soon. Credit available.

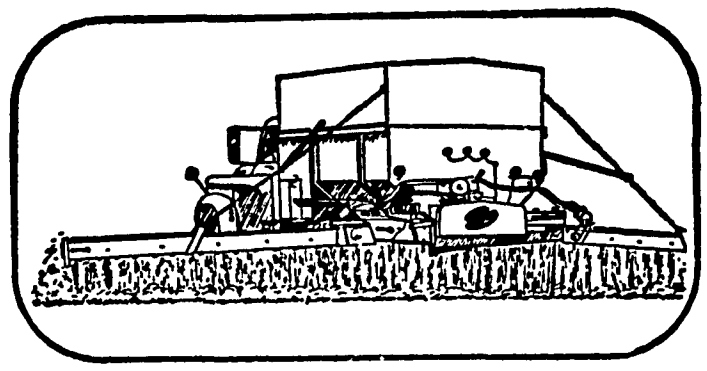
Stocks of all grains in the Commonwealth totaled 90 7 million bushels on January 1. This compares with 82 million bushels on the same date a year ago Feed grain stocks — corn, oats and barley — increased 12 percent, while food grains — wheat and rye — rose 2 percent, according to the Pennsylvania Crop Reporting Service

APPLY LIME ON FROZEN GROUND



Don't hesitate to apply lime, even if the ground is frozen. The freezing and thawing action of Winter helps disseminate the lime, assuring you a properly balanced soil, ready for Spring plowing. And remember, liming pays in extra bushels and tons of crops and forage.

MARTIN'S LIMESTONE

Tree Seedling Program Outlined

Among the many services of the Department of Forests and Waters to benefit the general public is the operation of a forest tree seedling program for reforestation and timber production purposes.

"This program provides an estimated 15,000,000 seedlings annually for spring planting but unfortunately," said Samuel S. Cobb, Director, Bureau of Forestry, "many residents of the Commonwealth have the mistaken opinion that these forest tree seedlings may be used as ornamental stock. Such is not the case"

Forest tree seedlings are sold at a nominal cost but the buyer must abide by the provisions of the Acts of May 5, 1927, P L 817; as amended by the Act of June 21, 1947, P L 777, as follows.

1 That all forest tree shrub and vine seedlings so purchased shall be planted in Pennsylvania on the site indicated in the sketch attached hereto and made a part thereof for watershed protection or for wood products;

2 That the trees will not be sold by the purchaser for removal from the land until they become large enough for use as wood products;

3 That a report on the planting will be furnished by the planter when requested by the department,

4 That the planted area will be protected as far as possible from fire, grazing and trespassing;

5 That the trees, shrubs and vines will not be planted for hedges, table trees, potted trees or for shade or ornamental use;

6 That if such trees, shrubs or vines are sold or offered for sale for ornamental purposes the person, partnership or corporation shall become liable to the Commonwealth for the payment of a penalty equal to three times the sale value of the trees, shrubs or vines sold.

"Forest tree seedlings are grown by the department at four nurseries," said Cobb: "Penn Nursery, near Spring Mills; Greenwood, near Huntingdon; the William F Dague Nursery, in the vicinity of Penfield; and at Mont Alto"

"These trees are used for specific purposes with a variety of side benefits — wildlife cover and watershed protection — and certain species have been found, through years of research, which generally survive best and grow to commercial size"

They include the white pine, red pine, Austrian pine, pitch pine, Virginia pine, Norway spruce, Japanese larch, European alder and black locust seedlings plus hybrid poplar cuttings.

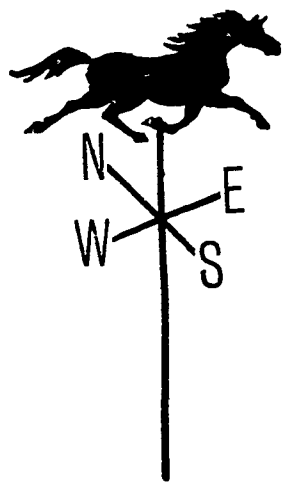
Consequently because of the very nature of these species," he noted, "they are not suited for and may not be used for ornamental purposes which includes Christmas trees"

Agriculturists were sweet on one report this week . honey production was up sharply in both the state and nation

U S production reached an all-time record of 283,268,000 pounds last year, 42 percent above the 1968 total. In Pennsylvania, the crop totaled 3,348.000 pounds, 9 percent more than in 1968 but short of the state's record, according to the State Crop Reporting Service.

There was sweet news for beekeepers, too The wholesale price of honey in Pennsylvania last year averaged 18 cents, one cent more than in the previous year.

Anyway you look at it...



Red Rose HORSE FEEDS

. . . are just about the best feeds you can feed to your horses

TAKE the worry out of feeding WITH THESE HORSE FEEDS:—

CLASSIC

A bulkly horse feed that keeps horses firm; promotes good growth.

EQUINADER

For young, growing and prized horses. Winter supplement.

RED ROSE "REGULAR"

The best all round economy horse feed that meets basic protein and energy requirements.

SUPER

For young, growing and prized horses. Contains grains, minerals, dextrose and cane molasses. Add only good hay for complete feeding.

HORSE PELLETS

A complete feed in pellet form. Combination of grains and high quality roughage type ingredients — to be fed with limited hay or poor quality hay.

Ephrata Young Farmers Hold First Annual Banquet

The Ephrata Area Young and Adult Farmers' Association held its first annual banquet last Friday in the Mt Airy Fire Hall One hundred sixty eight members wives and guests attended

Dr Walter K Trumbauer and C Daniel Biemesderfer were honored guests selected to receive appreciation award plaques for their service to the Ephrata Area Young Farmers' Association and the adult farmer program of Ephrata High School

Dr Trumbauer, a veterinarian in the Ephrata area, assisted the group on several occasions with animal health meetings and courses

Biemesderfer, Superintendent of Ephrata Area Schools District, was recognized for his interest and support of agricultural education Upon receiving the award Biemesderfer said, "The credit should go to the community and the school board"

Trophies were presented to top award winners of the 1969 corn growing contest Top placings in the corn silage program were: Jesse Balmer, R D. #4, Lititz, 11,670 pounds of total digestible nutrients, Luke Ray Zimmerman R D #2 Ephrata, 11,091 2 pounds TDN/A, Cliff Bollinger, R D #4, Lititz, 11,026 4 pounds TDN/A TDN yield was determined for each of the thirteen silage entries by Penn State forage analysis

High yield awards in corn grain went to Paul Bucher, R D #4, Lititz, 157 56 bushels of shelled corn per acre, Alvin Bollinger, R D #1, Lititz 149 61 bu /A, Earl G Martin R D #2, Ephrata, 148 99 bu /A

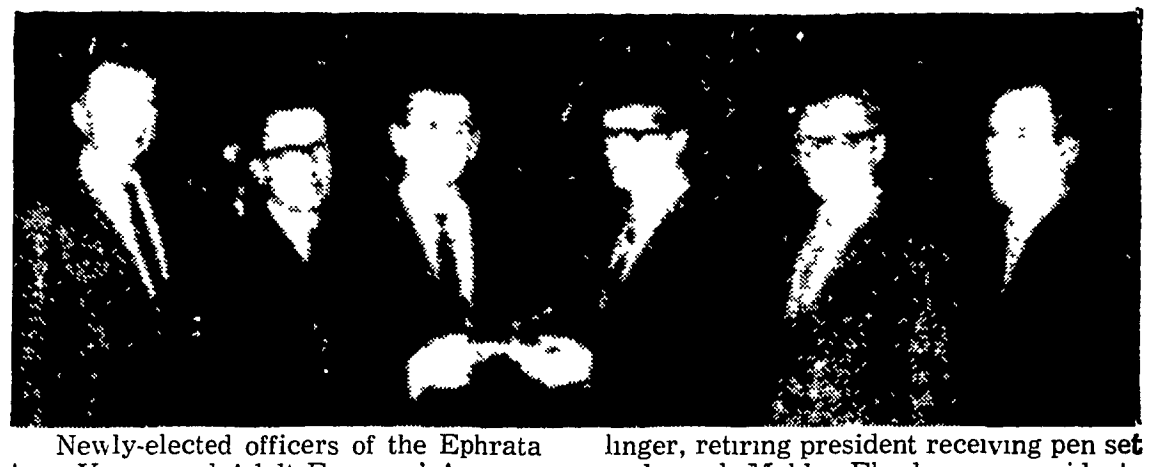
Over thirty five persons participated in the corn growing contest and management program Forage test kits and trophies were sponsored by nineteen agricultural businesses in the Ephrata area. Area businesses also provided dood prizes

Warren F Bollinger, retiring president, was toastmaster Grant Heilman, agricultural photographer of Lititz, presented a colored slide presentation entitled, "Agriculture in the U. S"

Henry Givler, area agriculture education advisor, installed the new officers Earl Stauffer, Pennsylvania FFA treasurer, represented the state association Robert Martin, secretary, and Jay Foreman, public relations director of Pennsylvania Young Farmers' Association, represented the state young farmer association.

Charles Ackley, Ephrata Area Young Farmer Association advisor, was presented an appreciation plaque from the retiring officers.

David Zimmerman (center), retiring secretary of the Ephrata Area Young and Adult Farmers' Association presents Appreciation Awards to C. Daniel Biemesderfer (left), Superintendent of Ephrata Area School District and Dr. Walter K. Trumbauer, veterinarian, Ephrata R1.



Newly-elected officers of the Ephrata Area Young and Adult Farmers' Association are (left to right): Jesse Balmer, Lititz R4, Public Relations; John R. Zimmerman, Ephrata R1, treasurer; Warren Bollinger, retiring president receiving pen set and gavel; Mahlon Eberly, new president; Earl Smoker, R1 Stevens, vice-president; and Marvin R. Sauder, R2 Ephrata, secretary.

Corn award winners at the Ephrata Area Young Farmers and Adult Association banquet last Friday were: (left to right), Cliff Bollinger, Lititz R4; Luke Ray Zimmerman, Ephrata R2; Jesse Balmer, Lititz R4; Paul Bucher, Lititz R4; Alvin Bollinger, Lititz R1; and Earl G. Martin, Ephrata R2.

● New Inspection

(Continued from Page 1)

The use of extenders and colored wrappers both of which were previously prohibited in Pennsylvania now are permitted he said

"There are but a few examples of the changes that will result from the less stringent regulations under which we now operate," he added

The double standard of inspection — under both federal and state regulations — often created difficult and confusing situations for meat processors and packers, Secretary Bull said "Uniform regulations will be an important factor in easing trade restrictions that stemmed from this double standard," he added

Secretary Bull pointed out the new regulations "merely permit the use of practices and products previously banned in Pennsylvania This does not mean that meat packers and processors must use these practices and products Packers generally will be as much concerned with the quality of their products under the new regulations as they were in the past"

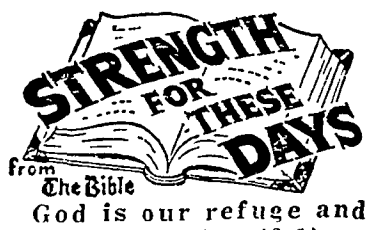
Holstein Association Needs Calves For Sale

The Lancaster County Holstein Association met Friday, Feb. 6 and announced that they need more calves for the sale sponsored by the State Association in Harrisburg on April 4.

Also discussed was a Pennsylvania Booklet insert to be published in the World issue on April 25 and Lancaster County Breeders are asked to participate Also anyone interested the Pennsylvania Holstein News needs more participants.

The county needs more Holstein Farm signs and a committee was appointed to handle it which includes Clyde Martin, chairman, Daniel S Stoltzfus and Kenneth M Rutt A special discount will be given on the signs until March 1

The association will also hold their annual Black and White Show on Thursday July 30 at the Guernsey Sale Barn The directors voted unanimously to cosponsor a class at the All American Show in Harrisburg



God is our refuge and strength.—(Psalms 46:1).

When we need the added strength, God is there to give it When we need healing, God is our healing. When we need courage, God is our courage. When we need faith, God is our rock, our strong foundation in whom we can trust.

Purina Dairy Conditioner Special can prepare cows for good production at low cost

If you're not among the many good local dairymen who have started mixing Purina Dairy Conditioner Special with your own grain to build a research-proved dry cow ration, it can pay you to check into this low-cost way of feeding dry cows

Purina Dairy Conditioner is a 16 percent protein ration, fortified with extra Vitamins A and D plus phosphorus to help guard against milk fever.

To help you save on dry cow feeding, Purina Research recommends varying feeding levels, depending on cow condition and the quality of your roughages For example, if a cow is in good condition and your roughages are of excellent quality, you would feed less Purina dry cow ration than if the cow were in only fair condition and if the roughages were of only fair quality

Using Purina Check-R-Mix* formulas we can build you a low-cost dry cow ration, combining Purina Dairy Conditioner with your grain Or, if you're feeding low-protein roughages, it may pay you to feed Dairy Conditioner "straight" — just as it comes from the bag

More and more successful area dairymen are proving that good dry cow feeding pays off in extra cow condition — and extra milk production in the next lactation For example, 100 to 200 pounds of additional body weight at freshening can pay off in 1,000 to 2.000 pounds of extra milk during the lactation

Drop in soon and get your free copy of the Purina Dry Cow Program folder. We'll be glad to point out how Purina Dairy Conditioner Special can help prepare your dry cows for good production at low cost

Farm Women

SOCIETY 14

Farm Women Society =14 met Wednesday in the home of Mrs Arthur Groff, 1254 Lime Valley Road, Lancaster. Co hostesses for the meeting were Mrs John Hershey, Mrs. James Hall and Mrs Charles Meloy Roll call was answered by giving a Valentine Verse It was reported that the group sowed 229 pieces and mended 19 garments at the Lancaster General Hospital recently.

Society =14 will be entertained by Society =7 at the Leacock Presbyterian Church on Saturday, March 14 at 1 p m.

Mrs Howard Combs, Paradise, was taken into the Society as a new member A Christmas Card was shown to the group from the Korean orphan which they support

The speaker for the meeting was Germano Moretti an Italian student who is attending Lampeter Strasburg High School under the American Field Service

The next meeting will be held in the home of Mrs. Everett Newswanger, 1753 Lincoln Highway East on March 11 The speaker will be Mrs. Paul Z Rummel and her topic will be Plant Life of Bible Times.

Correct Display

The correct way to display the American flag on Memorial Day is The flag flies at half-staff from sunrise until noon, after which it is raised to full staff until sunset.

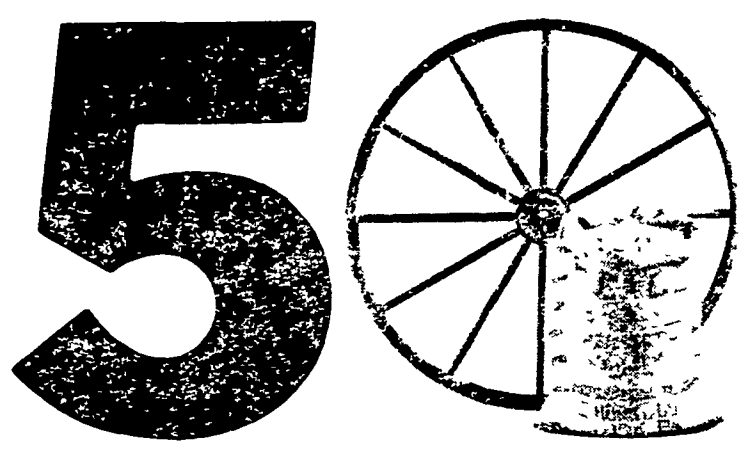
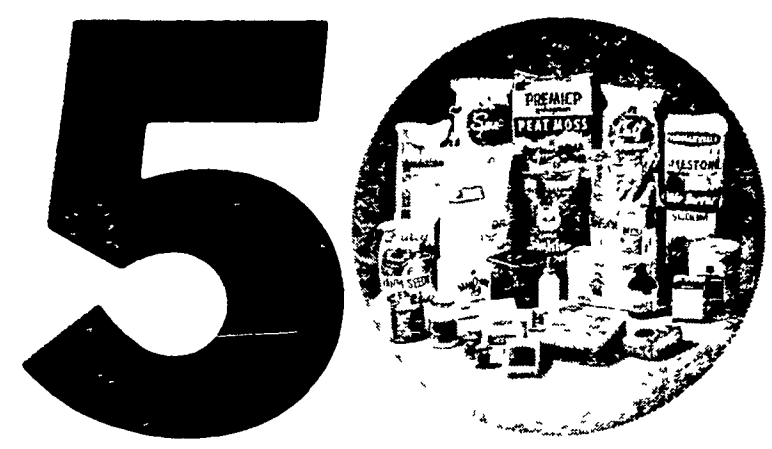
Since 1919, the only thing that hasn't changed is our original idea.



When we started out, we were chicken feed.

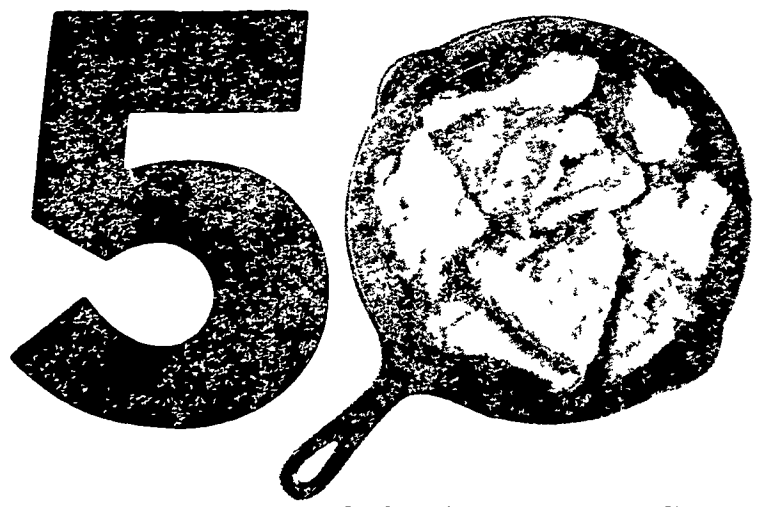
Also dairy and livestock feeds. $500 and a gon. Hard work, quality feeds at fair prices and old-fashioned belief in helping others

built as York's most modern feed mill. 30 tons an hour, electronically automated. So 50 years of helping others helped us



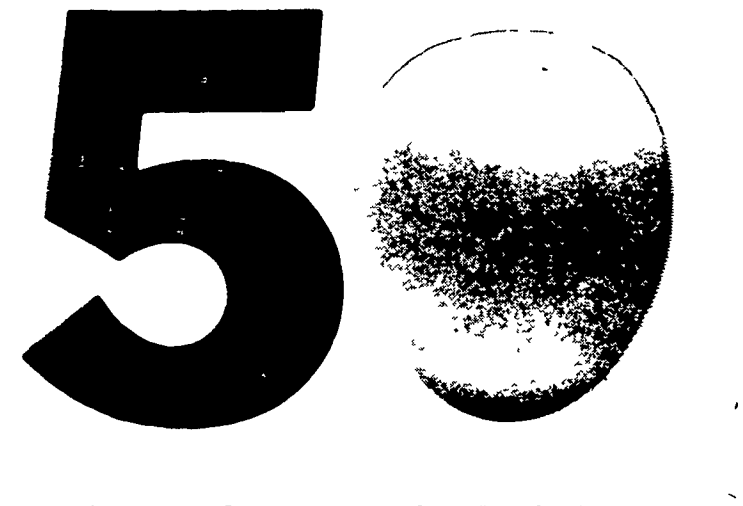
From feeds to farm supplies is only a step.

When you're selling feeds to neighboring farmers, you don't have to look far for other ways to be helpful. Seed, Fertilizer & Garden supplies. A modern research farm to test each new product thoroughly. Customers have counted on this kind of help for 50 years.



Now we've grown from chicken feed to chicken dinners.

As part owners of the Grimes Poultry Processing Corporation in Fredericksburg, we process 13,000,000 broilers a year. Ice packed and frozen. Cut up packs. And under the Dutch Treat label, a frozen, ready to serve line to help housewives get dinner faster. Again, helping others brought growth.



With us, the egg came after the chicken.

Only last year, we became joint owners of the Cloisterdale Farms operation in Ephrata. 360,000 caged layers handled entirely by automation! The know-how we gain we pass on to our feed customers. Helping them helped us reach 50 in style!

Our idea of quality products and helping others helped us through our first 50 years!

You just have to look back a little when you reach 50. For one thing, with deep gratitude to everybody who made this birthday possible. Customers. Employees. Friends. All along the way.

But we're looking ahead, too.

If we work hard

keep on bringing you quality products at fair prices

and hold fast to our original idea of helping others . . .

why our next 50 just might be even more rewarding! So keep an eye on this neighbor of yours. Pennsylvania owned. Pennsylvania managed, employing Pennsylvania people, helping to produce Pennsylvania food products.

We're just starting to grow!

50 YEARS HELPING PRODUCE BETTER FOOD PRODUCTS

USDA Probes Some Pesticides

The U S Department of Agriculture said this week it is investigating some commonly-used pesticides to determine whether they contain hazardous amounts of a toxic contaminant that may have caused birth deformities in laboratory mice exposed to the herbicide 2, 4, 5-T

Ned D Bayley, director of Science and Education, said the inquiry was initiated after new data submitted to the Department of Health, Education, and Welfare, indicated that the 2, 4, 5 T used in a study conducted by Bionetics Research Laboratories for HEW contained 27 parts per million of tetrachlorodibenzo-para-dioxin, compared with only about 1 ppm of this contaminant generally found in the herbicide.

The new data show that preliminary tests of 2, 4, 5-T with 1 ppm of this contaminant give no indication of birth deformities, Bayley stated in a letter on the subject to Rep Richard D McCarthy of New York It was the Bionetics study of 2, 4, 5 T, along with other pesticides, which was cited last October when it was announced that the Department of Agriculture would cancel registrations of this herbicide for use on food crops effective January 1, 1970, unless by that time the Food and Drug Administration, HEW, had established a safe legal tolerance for such use

"We are awaiting advice from DHEW as to whether or not they intend to establish tolerances for 2, 4, 5-T before we decide wheth

(Continued on Page 18)

Wheat Loan Program & Sale Policy Set

Wheat from the 1969 crop eligible for price-support loans in on-farm storage or in commercial storage can have loans extended (resealed) following regular maturity dates in the spring and summer of 1970, it was announced today by the U S Department of Agriculture Concurrently, USDA announced its CCC wheat sales policy for the marketing year beginning July 1 Reseal loans will continue to be available on 1968-crop wheat in on-farm and commercial storage, and on 1967-crop farm stored wheat but not on older crops of wheat

Approximately 42 million bushels of wheat from the 1964, 1965 and 1966 crops in farm storage and 55 million bushels of 1967 crop in commercial storage will not be continued under reseal loan after the 1970 maturity dates These dates for the 1966 and 1967 crops are April 30 in all States except

Continued on Page 28)

RECORD KEEPING

A special program to outline an agriculture records program developed by Penn State will be held at 8 p m Tuesday, Feb 17, at the Farm and Home Center

Speaker will be William H Dickinson, farm management specialist, who will outline the electronic system developed at the university

Wives are extended a special invitation, since many keep the farm records

Farm Briefs

No Change Made In Poultry Inspection

There will be no changes made in the long-standing Federal inspection policy under which poultry affected with diseases of the leukosis complex are condemned This was emphasized last week by Secretary of Agr Clifford M Hardin who noted that his decision — which overrides a recommendation made by a USDA advisory committee — was made following receipt of a report USDA requested from the U S Surgeon General

Secretary Hardin also emphasized that he concurred with Surgeon General Jesse L Steinfeld's contention that even though there is no known link between the poultry leukosis viruses and human disease, nor any known hazard to human health, "it is aesthetically undesirable and unacceptable to pass for human food any poultry showing visible signs of leukosis lesions or tumors" Thus, such poultry will continue to be regarded as totally unfit for human consumption.

Cattle Numbers On Farms At Record High

More cattle and calves, chickens and turkeys on farms, but fewer hogs and pigs, and sheep and lambs, according to USDA's 1970 Livestock and Poultry Inventory issued last week Cattle and calves on farms on Jan. 1 totaled 112 3 million head, up 2 pct. from a year earlier and record high But, dairy cow numbers were at record lows

Dairy cattle 2 years and older at 13 9 million head, were down 2 pct. from a year earlier and the lowest since 1886 Heifers 1 to 2 years, at 3 5 million, and

Beacon now offers a feeding program for dairy steers that takes the roughage out of feeding. It is a research proven program that has been fed successfully in commercial feedlots in the Midwest for over six years.

Get fast, low cost gains without roughage:

- Birth to market in less than a year.
- Daily gains (birth to butcher) of 2.8 lbs.
- Dressing percentage up to 62%.
- Feed conversion approximately 5 lbs. of feed per pound of gain, also from birth to butcher.
- No hay, no grass, no silage.
- Low investment, low labor.
- High grade carcasses; young, tender meat.

Tend-R-Leen is a registered trademark of Doughboy Industries, Inc., New Richmond, Wisconsin.

(Continued from Page 17)

heifer calves, at 3 9 million, were **both off 2 pct.** from a year earlier and lowest since records began in those categories in 1930.

But, these declines were more than offset by increasing beef cattle numbers At 91,135,000 head, all beef cattle were **up 3 pct.** from a year earlier and record high Cows 2 years and older, at 37 4 million head, **up 3 pct.**, while heifers 1 to 2 years, at 9 7 million, and calves, at 29.1 million, **both up 4 pct.** Steers 1 year and older, at 13 million head, and bulls 1 year and older, at 2 0 million head, **both up 2 pct.**

Meanwhile, sheep and lambs on feed, at 20,422,000 head, were **not only down 4 pct.** from a year earlier, but **the lowest** since records began in 1867. Hogs and pigs, at 56 7 million head, were **down 6 pct.** from a year earlier, but chickens, (excluding broilers) at 431 5 million, were **up 3 pct.**, and turkeys, at 6 7 million, were **up 1 pct.**

Value of all livestock and poultry on farms, at $23 5 billion, was **up 16 pct.** from a year earlier and record high. Meat animals (cattle, hogs, and sheep) at $22 9 billion, compared to $19 7 billion a year earlier.

Hog Cholera Outbreaks Up In '69

The number of hog cholera outbreaks **up sharply** last year There were 1,481 confirmed in the U S during the year. That's **up 80 pct.** from the 1968 total (of 822). But, it's well below the 5,000 to 6,000 estimated outbreaks that occurred yearly before the nationwide eradication program began in 1962

Despite the increase, USDA officials are optimistic over the progress made toward eradication The reason Nearly ⅔ of the national total were in 7 states Mo (218), Texas (213), N Car. (208), S Car. (110), Ark (93), Md (78), and Va (64). Moreover, 16 States had no outbreaks, and 10 States had four or less each

Net Income Per Farm At $5,468

Gross farm receipts, estimated at a record $54 6 billion during 1969, up from $51 1 billion in 1968 Realized gross farm income estimated at clise to $16 3 billion during 1969, with net income per farm estimated at $5. 468, up from $4,805 in 1968

Livestock and livestock product receipts were estimated at $28 5 billion, compared to $25 5 billion a year earlier, with prices received by farmers for livestock and livestock products, up 12 pct

Receipts from crops, at $18 8 billion, were up slightly from 1968, with crop production up slightly, but prices off slightly

Farm production expects, at $38 6 billion, were up $2 3 billion from a year earlier and record high

When in the elevator with women passengers aboard, always take your hat off Not only is it polite, it saves the hat from being crushed when the ladies rush the door

● USDA Probes

(Continued from Page 17)

er to cancel or extend uses of 2, 4, 5-T on food crops," the letter said "Our January 1, 1970, date was based on DHEW's expectation that they would have reached a decision by that time. That agency believes that the public interest would best be served by waiting for additional research data which will be available shortly We concur in their judgement"

The inquiry launched by the Department into the possibility of excessive contamination of other pesticides with the same substance found in the 2, 4, 5-T sample used in the Bionetics study will include seventeen herbicides, fungicides, and insecticides. All seventeen compounds are polychlorphenolic pesticides. Appropriate and immediate action to protect the public health will be taken if evidence resulting from this inquiry justifies it.

MIGHTY MIX FOR MILK

Ful-O-Pep Super Milking 32

More and more profit-minded dairymen are increasing milk production—and milk checks—with Ful-O-Pep Super Milking 32, *the mighty mix for milk!*

At low cost, too, because you use your own grain, balanced with essential nutrients in Super Milking 32. This popular concentrate contains 32% protein—high-quality, complete proteins. It's power-packed with needed vitamins, minerals, molasses . . . all to help you build an efficient ration for heavy, continuous milk flow.

Ask for simple, easy formula. We'll be glad to show you how to make a powerful 16% milk-making feed — with economy — using only about 500 lbs. Ful-O-Pep Super Milking 32 per ton. We know you'll be pleased with the results. So drop by as soon as you can.

MAKE US YOUR FARM HEADQUARTERS

IF WE CAN RAISE PULLETS ON OUR FARM YOU CAN DO IT ON YOURS

WE HAVE BEEN SELLING MATURED PULLETS FOR THE PAST THREE YEARS... BUT PRESENTLY ARE SOLD OUT BECAUSE OF A LIMITED AMOUNT OF GROWING SPACE...

WE RECOMMEND THAT YOU BUY
MUSSER'S M-327 CHICKS

IF YOUR ANSWER IS "NO" TO ANY OF THESE QUESTIONS, YOU NEED MUSSER'S M-327 CHICKS FOR YOUR REPLACEMENT NEEDS.

1.

Do you have coccidiosis under control to the extent that you seldom have a minor outbreak of coccidiosis?

2.

Have you been able to raise your pullets over the last few years with a consistent low level mortality rate, while contending with this highly publicized leukosis (Marek's) disease?

3.

Has the mortality and the rate of lay of your pullets in their pullet year been satisfactory, so that you can be assured of a yearling capable of showing a profitable second year?

MUSSER LEGHORN FARMS — Breeders of 2 separate lines of Musser Leghorns, which when crossed, produced the sturdy M-327 Leghorn Chicks that you have been hoping for recently.

WE ARE CLASSIFIED BY THE PENNSYLVANIA DEPARTMENT OF AGRICULTURE BUREAU OF MARKETS AS

PULLORUM - TYPHOID CLEAN Under the National Poultry Improvement Plan

FOR THE
FARM WIFE AND FAMILY

SPECIAL BREADS

Special occasions deserve special breads, special breads deserve special care in preparation and service In such a case Tangy Banana Ring is just what you're looking for Golden raisins, apricot bits and lemon juice enhance the blended flavors of the fully ripe bananas and the bran cereal. As a finishing touch drizzle the fragrant baked ring lightly with a confectioners sugar glaze before slicing This bread deserves your prettiest serving plate

TANGY BANANA RING

- ⅓ cup seedless golden raisins
- ⅓ cup dried apricots
- 1 cup all-bran cereal
- 1 cup mashed bananas, fully ripe
- 1 teaspoon lemon juice
- 2 eggs
- ⅓ cup margarine or butter, softened
- 1 cup sifted regular all-purpose flour
- ¾ cup sugar
- 1 teaspoon baking powder
- ¼ teaspoon baking soda
- ¼ teaspoon salt
- ½ cup coarsely chopped nuts

Rinse raisins and apricots, then put them through medium blade of food chopper Set aside. Combine all-bran, bananas and lemon juice, let stand about 5 minutes or until the all-bran is softened Add eggs and margarine; beat well Sift together flour, sugar, baking powder, soda and salt Add to all-bran mixture, stirring only until combined Lightly stir in fruits and nuts Pour into greased 9-inch ring mold Bake in moderate over (350 degrees) about 40 minutes or until golden brown Let stand in ring mold on wire rack a few minutes; invert onto warm serving plate Slice and serve warm with whipped cream cheese or whipped butter

NOTE After removing from mold drizzle lightly with confectioners sugar glaze, if desired

LEMON BALL COFFEECAKE

- 1 package (13¾ ounces) hot roll mix
- ¼ cup toasted coarsely chopped almonds
- 3 tablespoons light brown sugar
- 1½ teaspoons grated lemon peel
- ¼ cup (½ stick) butter, melted

Prepare dough according to package directions, only substitute milk for water. Cover and allow to stand in warm place until doubled Meanwhile, mix together almonds, sugar and lemon peel. Pinch off pieces of dough the size of walnuts, shape into balls and roll in melted butter; arrange a little more than half in 9-inch pie plate. Sprinkle half the almond mixture over balls, then arrange a top layer of balls extending only to inner edge of outer circle; sprinkle with remaining topping. Drizzle over any remaining butter Cover and allow to stand in warm place until almost doubled Bake in preheated 375 degree oven 20-25 minutes

* * * *

MOLASSES BRAN MUFFINS

- ¼ cup shortening
- ¼ cup molasses
- 1 egg
- 1 cup bran
- ¾ cup milk
- 1 cup sifted all-purpose flour
- 2½ teaspoon baking powder
- ½ teaspoon salt
- ½ cup finely cut dates

Blend together shortening and molasses. Add egg; beat well Stir in bran and milk; let stand until most of moisture is taken up Sift together flour, baking powder and salt Add to molasses mixture with the dates; stir only until blended Fill greased muffin cups two-thirds full Bake in 350 degree oven 30 minutes Makes 12 small muffins

ORANGE TOPPED DINNER ROLLS

- 24 soft dinner rolls
- Raisins
- ¾ cup frozen orange juice concentrate, thawed and undiluted
- ⅓ cup honey

To top 2 dozen soft dinner rolls that are baking sprinkle with raisins. Mix together the thawed orange juice concentrate and honey Brush tops of rolls with this mixture Continue baking at 375 degrees for 15 minutes. If desired, while still warm, drizzle tops with sugar icing

* * * *

GINGERBREAD SQUARES

- ½ cup shortening
- ½ cup sugar
- 1 cup molasses
- 2 eggs
- 2½ cups sifted all-purpose flour
- 1 teaspoon salt
- 2 teaspoons baking powder
- ½ teaspoon baking soda
- 1 teaspoon ginger
- 2 teaspoons cinnamon
- ½ teaspoon ground cloves
- 1 cup hot water

Cream shortening Gradually add sugar; cream mixture until light and fluffy Blend in molasses Beat in eggs, one at a time Sift together flour, salt, baking powder, baking soda and spices Add to creamed mixture alternately with hot water. Turn into a greased and wax-paper-lined 9-inch square pan Bake in 350 degrees oven 40 minutes Cool slightly. Cut and serve with butter, if desired.

QUICK CAKE ROLL

- ⅔ cup canned cherry pie filling
- 3 eggs
- ½ cup granulated sugar
- ¼ teaspoon almond extract
- ¾ cup pancake mix

Grease bottom and sides of a 15 x 10-inch jelly roll pan; line with waxed paper, letting paper extend 4 inches beyond pan on either end; grease again Evenly spread pie filling over bottom of pan Beat eggs until thick and lemon colored Slowly add sugar, beating constantly. Stir in almond extract and pancake mix. Slowly pour and spread over pie filling in pan. Bake in preheated hot oven (400 degrees) 8 to 10 minutes.

While cake is baking, sprinkle a towel well with confectioners sugar Immediately on taking cake from oven, loosen edges of paper from pan, leaving cake attached to paper. Invert pan onto towel; remove pan. Carefully loosen edges of paper from cake; slowly peel waxed paper from bottom of cake Roll up, using

CORRECTION

In last week's issue in Mrs James Long's recipe for Pumpkin Bread it stated to use 3 cups water This amount should have been ½ cup water

Corrected recipe is as follows:

PUMPKIN BREAD

- ½ teaspoon cinnamon
- ¼ teaspoon salt
- ½ teaspoon soda
- 1¾ cups flour
- ½ cup oil
- ⅓ cup water
- 1 cup cooked pumpkin
- 2 eggs

Mix dry ingredients and add to other ingredients and mix well. Add ½ cup walnuts Bake 1½ hours at 350 degrees.

Farm Women

SOCIETY 1

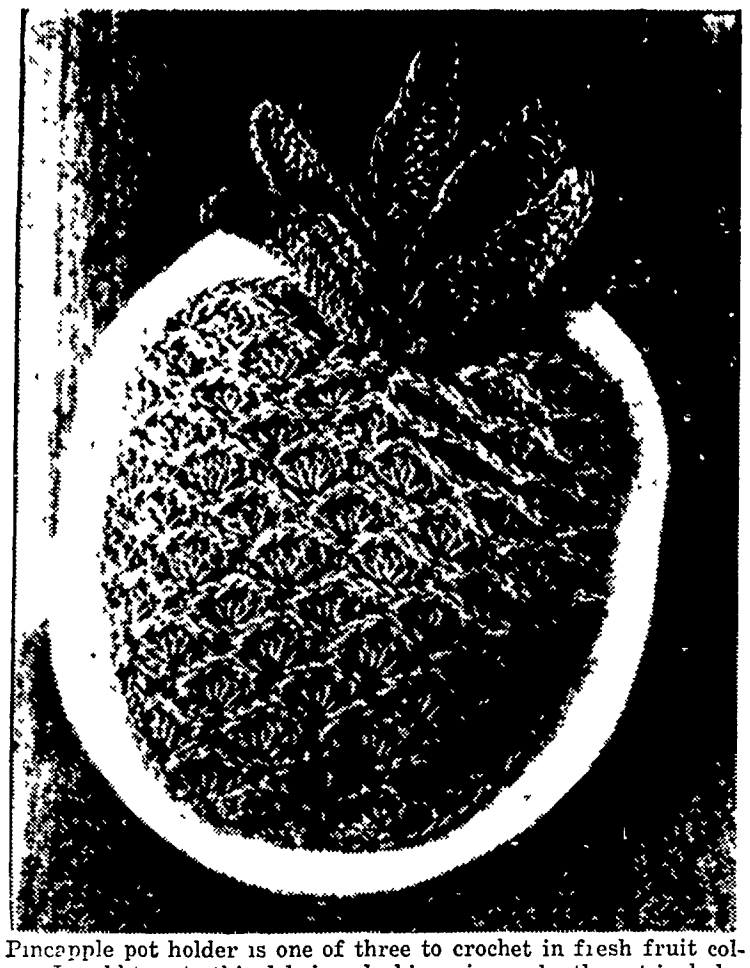
The Society of Farm Women 1 heard several reports at its recent meeting at the home of Mrs. Neil Clark. Presiding at the meeting was Mrs. Scott Garman. The singing was led by Mrs. Roy Brubaker and Mrs. Graybill Hollinger presented the devotions The group answered roll call by naming the president in office when they were born.

Mrs. Hollinger, vice president, reported on the executive board meeting she had attended on Feb. 3. She announced that a Spring Rally has been planned at Cumberland County, a bus trip will be taken to the flower show at Philadelphia on March 16, a request is being made for contributions for scholarships for Home Ec students and that the county project for the year may be selected from the Conestoga Valley Assn or the Embreville State Hospital It was also noted that the Milton Hershey School Boys Choir will present a program at the Lampeter-Strasburg High School on Feb. 24 The society selected Conestoga Valley Assn as their project

Mrs Daniel Brubaker, Mrs Martin Moore and Mrs Amos Shenk gave reports. Mrs. John Newcomer announced that a bus trip has been set for Society 1 to visit the Governor's Mansion and Capitol on June 24. Persons interested in going may contact Mrs. Newcomer.

A covered dish, all day sewing meeting will be held at the home of Mrs. Clayton Sangrey, Lititz R2, on Thursday, February 19 The group will make bed pads for Luther Acres

The next meeting will be held on March 7 at 1:30 p m at the home of Mrs. Newcomer. Mrs Noah Fuhrman will speak on "Humor in Pennsylvania" Mrs. John L. Weaver will present the devotions.



Pineapple pot holder is one of three to crochet in fresh fruit colors. In addition to this delicious-looking pineapple, the set includes a red apple and a cluster of yellow lemons. All are made of "Speed-Cro-Sheen," appliquéd on felt backing. Free instructions are available by sending a self-addressed, stamped envelope to the Needlework Editor of this newspaper along with your request for Leaflet PC 3256-8.

SOCIETY 6

A meeting of the Society of Farm Women 6 was held at the home of Mrs. Susan Brill, Elizabethtown, with co-hostesses Mrs Elmer Gantz, Mrs. Paul Brandt and Mrs Minnie Kolp Devotions were led by Mrs. Martha Eshleman.

Reports from the state convention delegates, Mrs Laura Snyder and Mrs Esther Frey, were given.

A representative of the Pennsylvania State Police presented a film on drugs, followed by a question and answer period The society also voted to give $25 to the Craig Harnish fund.

SOCIETY 10

Members of Society of Farm Women 10 sewed cancer dressings and heard state convention reports at a recent meeting held at the home of Mrs William Fox 1209 Wheatland Ave Mrs Cyrus Neff and Mrs W Raymond Dixon, delegates, led the discussion

Miss Eliza Esbenshade was cohostess and Mrs Jacob Esbenshade was in charge of devotions.

During the business session conducted by Mrs Jacob Evans, president, $15 was donated to the

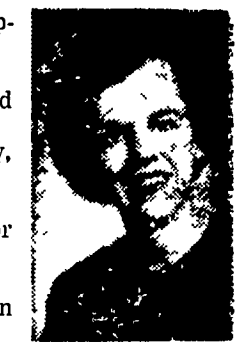
Chopped hard cooked eggs, corn beef, or salami, mustard, pickle, and mayonnaise.



THOMAS

Buying Rugs Or Carpets

The quality of a rug or carpet depends on five factors.

Good quality raw material

Weight of face yarn per square yard

Pile height

Closeness of pile, lengthwise.

Closeness of pile, crosswise.

When you shop for a carpet, consider:

Size of the room.

Activities carried on in the room.

Family members—number and age.

Amount of money you can spend.

What you desire most—color, long life, luxury

Color of furnishings which may influence your choice

Major changes considered in life of carpet

Time and energy for care and maintenance

Meal Preparation Time-Savers

Keep meals simple Plan them around the foods your family likes Vary the seasoning and the method of serving to keep them from becoming humdrum.

Plan fewer dishes, with larger servings Include more one-dish meals, and select some that you can prepare quickly, top-of-the-range fashion.

Serve salads from a large bowl instead of arranging individual servings On occasion, this plan will reduce clearing-away and dish-washing time

Cook vegetables in their skins when possible It will save time, flavor, and food values

Small equipment will shorten cooking time Use muffin tins or individual casseroles for meat loaves, pies, and puddings

Select some foods that require little cooking or preparation time

Collect menus and recipes for quick meals and keep an emergency shelf of supplies on hand to match some of the menus and recipes.

● For The Farm Wife

(Continued from Page 20)

towel as a guide Let stand at least 5 minutes before serving. Slice and serve warm with scoops of ice cream.

PEACH PANCAKES

- ½ cup pancake mix
- ½ cup milk
- 1 egg
- 1 tablespoon melted or liquid shortening
- 3 tablespoons drained, diced canned peaches

Place mix, milk, egg, shortening and peaches in bowl Stir lightly until batter is fairly smooth. Pour batter onto hot, lightly greased griddle. Turn pancakes when tops are covered with bubbles and edges look cooked Turn only once. Makes 2 servings

Bees Can Endure Cold

Bees can take good care of themselves in cold weather if they are provided with enough foood says William Clark, Jr, Extension apiculturist at The Pennsylvania State University. Some wind protection is helpful in conserving food and in saving the brood during early spring. Don't worry about snow on the hives; it's good insulation reminds Clarke.

It's what you don't know about cancer that can hurt you Get the facts from the American Cancer Society.

Memorial Fund Established For Mrs. Miles

A memorial to the late Kathryn Bele Niles, who served the poultry industry with dedication for over 25 years, is being established in the new headquarters building of the American Home Economics Association in Washington, D C

Fourteen past presidents of the Poultry and Egg National Board have been contacted to held stir interest and aid in the collection of funds for this memorial. Mrs. Niles, who served as Director of Home Economics at the Board for 21 years, was permanently enshrined in the Poultry Hall of Fame in 1965.

The funds will be used in a specific place in the AHEA headquarters building now under construction on historic Massachusetts Avenue, N. W., in the Nation's capitol. A suitable plaque will be used to designate the memorial The exact use will be determined by the amount of funds collected.

Mrs Niles was a long time member of the American Home Economics Association and was very active in its programs.

AHEA, which is now in its 61st year, is a professional organization with a membership of some 37,000 home economists plus 12,000 student members The Association's objective is to improve the quality and standards of individual and family life through education, research, cooperative programs, and public information.

Leslie S Hubbard of Hubbard Farms, Walpole, New Hampshire, and PENB past president (1955-56), while urging all people in the industry to send in their contributions said, "Mrs Niles served the entire industry with complete dedication, we will forever be indebted."

Checks should be made payable to the American Home Economics Association and sent to the Poultry and Egg National Board, 18 South Michigan Avenue, Chicago, Illinois 60603

Pioneer Corn Seminar Set For Friday

Next Friday, Feb 20, the Pioneer Corn Company, Inc. of Tipton, Indiana, will present a corn production seminar at the Farm and Home Center. The meeting will begin at 1 p m , and last for approximately two hours

The seminar has been organized and directed for farmers in this area by the Eastern Sales Manager, John Weidman, Mt. Joy The meeting will feature Vance York, Manager of Pioneer's Sales Service Department, who is an authority on corn growing characteristics and methods

York is a graduate of Purdue University's School of Agriculture He has been with Pioneer for 15 years, and has had much experience with corn growing practices His primary objective is to furnish modern corn growing help and information to district sales managers, salesmen and farmer customers He collects, evaluates and reports yield data on different tested hybrids. The latest research information dealing with corn growing practices is known by York because of his close work with the various state universities.

The purpose of the meeting is to provide to farmers attending the most current knowledge of corn growing practices. A question and answer period will follow to allow farmers to discuss any areas not covered during the program. All local farmers are invited to attend.

"Shoe" Sabotage

The word sabotage comes from sabot, the French word for shoe, after a disgruntled 19th-century French worker clogged his employer's machinery with his wooden shoe.

A Warning?

It could be something ordinary, hoarseness or difficulty in swallowing But if it persists for two weeks, the American Cancer Society suggests that you see your physician

Stockyard Volume Up $1.7 Million; But Less Animals Sold

Higher prices for livestock pushed the dollar volume at the Lancaster Union Stockyards to $53,228,960 last year, despite an 8 5 per cent decrease in numbers of animals.

The 1969 figure was based on a livestock volume of 272,783 head and was up more than $1.7 million from a year earlier. Volume in 1968 was 298,669 head.

Based on Pennsylvania Department of Agriculture figures, the dollar volume was the highest in three years, but the animal receipts was the lowest.

Stockyards revenues in 1968 were reported as $51,486,766, and in 1967 were $44,753,085

Declines in volumes of cattle, calves, hogs and sheep were reported this year from last year.

The heaviest decline came in beef cattle trade with 19,849 fewer head sold. Calves dropped by 1,111 head, hogs by 1,430 head and sheep by 3,496 head

Trading volumes for the past three years include

	1969	1968	1967
Cattle	152,061	171,910	169,750
Calves	23,038	24,149	26,848
Hogs	82,812	84,242	73,717
Sheep	14,872	18,368	18,809
Total	272,783	298,669	288,649

(Continued from Page 17)

Idaho, Minnesota, Montana, North Dakota, Oregon, Washington, and Wyoming where the maturity date is May 31. For the 1964 and 1965 crops, the maturity date is March 31.

The policy of dropping older crops from annual loan extension programs has long been followed by Commodity Credit Corporation as a matter of good management practice As newer crops become eligible for reseal loans, the older stocks are moved out so only the fresher supplies are continued in storage.

To help advance planning of wheat marketing, USDA announced its sales policy for the marketing year beginning July 1, 1970. Sales of storable wheat will be made for unrestricted use at not less than the 1970 loan rate, where stored, plus an 18¾ cents-per-bushel flat markup (representing 15 percent of the national average loan rate), plus carrying charges of 1½ cents per bushel per month for 9 months (beginning in the second month), or the market price, if higher.

A memorial gavel, honoring the educational work of Arthur A. Schultz, formerly of the Reading Bone and Fertilizer Company who served as first president of the Pennsylvania Plant Food Educational Society, was presented to John C. Hoffman, of the Lancaster Bone and Fertilizer Company, Quarryville, society president, at the recent Lime and Fertilizer Conference at The Pennsylvania State University. The gavel, to be passed on each year to the plant food society's president, was designed by the Reading Bone and Fertilizer Company and presented to Hoffman by William Angstadt, company representative.

Many farm lease arrangements are being made at this time of the year. There are many forms of leases and all kinds of clauses made to suit different individuals The important thing is to get the lease into writing and signed by all parties concerned, and each person to have a copy A written lease may not guarantee complete honesty, but it will provide for a better understanding of all responsibilities; and results in less disputes and dissatisfaction. If there is a chance of misunderstanding, there will be.

GROWERS FERTILIZER SOLUTIONS

On-the-Farm Delivery by Growers Trucks

— applied in the row is one of the best and quickest complete analysis starter fertilizers on the market today.
— applied as a foliage spray is very quickly absorbed through the leaves.
— are 90 to 95% available to the plant.
— are non-toxic, non-corrosive and non-poisonous to animals.
— will not freeze.
— are delivered to the farm to 300 gallon Growers owned and maintained bulk tanks.
— are applied by inexpensive equipment offered by Growers.
— give larger yields, result in earlier maturity, lower moisture content, and better quality in crops.
— offer a more economical and easier means of fertilization.
— improve soil conditions and farm production when used in conjunction with the "Growers Program."

Paul S. Ebersole, Elizabethtown R. D. 1, got 190 bu. yield per acre with a Growers Fertilizer Solution cost of only $6.90 per acre.

FREY FREE STALL
Lifetime Free Stall Housing

Cut bedding costs 75%, reduce labor for barn cleaning and cow washing; reduce teat and udder injury to the minimum — house your milking herd in free stall housing. Each cow provided a stall for loafing. She won't be stepped on, the rear curb forces manure out into alley for mechanical cleaning or washing. A few minutes twice a day cleans the stalls and curbs, bedding lasts almost forever if your stalls fit the cows. Popular sizes are 6'6", 7' and 7'6". Size 'em by breed.

Our free stall partition may be mounted on wooden head boards or we make a steel divider. Set the legs in 8 to 10" concrete curbs to hold and retain bedding. Stall floor can be soil, sand or gravel. Bedding — straw, sawdust, peanut hulls, ground corn cobs, etc. Should be installed with paved alley surface 8 feet wide for mechanical cleaning or washing.

● Farm Women

(Continued from Page 21)

March of Dimes Also a bus trip to the flower show at Philadelphia was planned for March 18, leaving the CTC garage at 7.30 a m Reservations are in charge of Mrs Frank Hodecker, Rohrerstown, and Mrs Clifford Shoemaker, Willow Street.

The monthly mini-auction with about five members bringing a homemade article to sell featured sugared nuts and a piece of decorative garden wood

The next meeting will be held March 7 at the Landis Valley Motel (Room 27) when the "Generous Years," an autobiography by Chet Huntley about his youth will be reviewed.

Miss Frances LeFevre and Mrs Blaine Stewart will be hostesses

SOCIETY 17

Society of Farm Women 17 met recently at the home of Mrs Clyde Kreider, Buck, with Mrs Howard Frank and Mrs Melvin Marron as co hostesses

Devotions were in charge of Mrs Kreider Mrs Ernest Shaub, president, conducted the business meeting.

A report on the state convention was given by Mrs Everett Kreider, Buck.

A donation was made to the Craig Harnish Fund and Mrs Marron of the sunshine committee, reported that several cards and gifts were sent to the sick and shut-ins. Members will take cookies and cakes, weather permitting, to the Valley Forge Veterans Hospital on Feb. 21.

SOCIETY 20

At a meeting of Society of Farm Women 20 held in the home of Mrs William Herr, Quarryville, Mrs Elam Hess presided The co-hostess was Mrs. Glenn Ressel who also led devotions

Fifty dollars was donated to the Craig Harnish fund Mrs John Ferguson, Mrs Joseph Best and Mrs. Marshall Rintz, delegates to the state convention, gave reports

The society will sew cancer dressings on February 18, all day, at the home of Mrs Park Reinhart with a covered dish lunch at noon.

The next regular meeting will be held at the home of Mrs William Crawford, Kirkwood, March 5 at 1 45 p m when Easter bonnets made by members will be modeled.

SOCIETY 22

Farm Women Society No 22 met in the home of Mrs William Weller, 15 Milan Avenue, Willow Street, with Mrs Henry Hess serving as so-hostess

A safety program featuring Raymond C Mullin, professor at Millersville State College was presented He spoke to the group on "Accidents Are Not Accidental."

The Society plans to entertain their husbands at a bowling party on February 21 after which a social will be held in the home of Mrs Richard Forry, 2020 Horseshoe Road

The next meeting will be held in the social rooms of the Willow Street United Church of Christ when Society No 29 will be entertained at a covered dish social Mrs Richard Lefever will demonstrate the making of candy and Easter eggs.

Hebrew vs. Jewish

In modern usage, the word Jewish is the right one to designate the religion Hebrew is the term for the language of the Old Testament — the Jewish Bible.

GRANGE NEWS

"Pollution On The Farm" was the theme of a program presented by Mrs Stanley Stauffer Jr. at the Fulton Grange meeting Monday. Mrs. Stauffer spoke about pollution of the air by pollen from ragweed, goldenrod and similar plants in the summer and stressed the importance of irradicating such plants as they are a health hazard to thousands of hay fever sufferers.

Taking part on a panel discussion were Lloyd Welk who spoke on "Water Pollution" and the many phases which originate on the farm, including household laundry detergents which pollute streams David Knight's subject was "The Control Of Various Farm Manures" "Chemical Carry-over from Pesticides and Herbicides" was discussed by LeRoy Welk and Clifford W Holloway Jr., who represents the State Grange on the Governor's Advisory Committee on Solid Wastes Management, spoke on "Landfills."

The following couples, who were sent on a scavenger hunt from the "Truth Or Consequences" stunt at the January 26 meeting, came back with their trophies: Mr. and Mrs Gyles Brown, Mr. and Mrs. Thomas Galbreath, Mr and Mrs. Ambrose Giffing and Mr. and Mrs. Norman Wood. Mr. and Mrs Gyles Brown were declared the winners and received free turkey dinner tickets for Fulton Grange's annual dinner, April 4. J. Robert Reed, accompanied by Mrs Richard Jackson on the piano, entertained with several violin numbers.

Richard Holloway presided at the business session The Women's Activities committee, Mrs Charles Reath, chairman, announced a National Grange cotton sewing contest from February 1 to April 30. Judging will take place May 11 on the local level and the National Grange winner will receive a two-week trip for two to Hawaii by Jet.

Miss Sylvia Shirk announced that the Youth committee will sponsor a record hop at the Grange Hall hosted by Bob Gentry of WLAN, Lancaster, February 28 from 8 to 11 P.M. and a square dance March 14 for the young people of the community. They are sponsoring a trip to Hershey to see the Hershey Bears play Montreal Feb. 21 and held a sledding party January 31.

The Grange went on record opposing a state bill introduced by C. L. Schmitt, (Dem.) Westmoreland Co., to license cats They also urged House members to support legislation for a 50% increase in auto license fees instead of 100% and asked that large trucks bear a fair share of increased license fees.

Seventeen went on the tour of Kunzlers' Meat plant and Armstrong Cork Co. Floor plant January 20. The following received congratulations from the State Grange Master for securing members last year: Mrs. Harold Alexander, Mrs. Jacob Fantom, Mr. and Mrs. Charles McSparran, Mrs. Charles Reath, Mrs. Stanley Stauffer Jr. and Mrs. Jesse Wood.

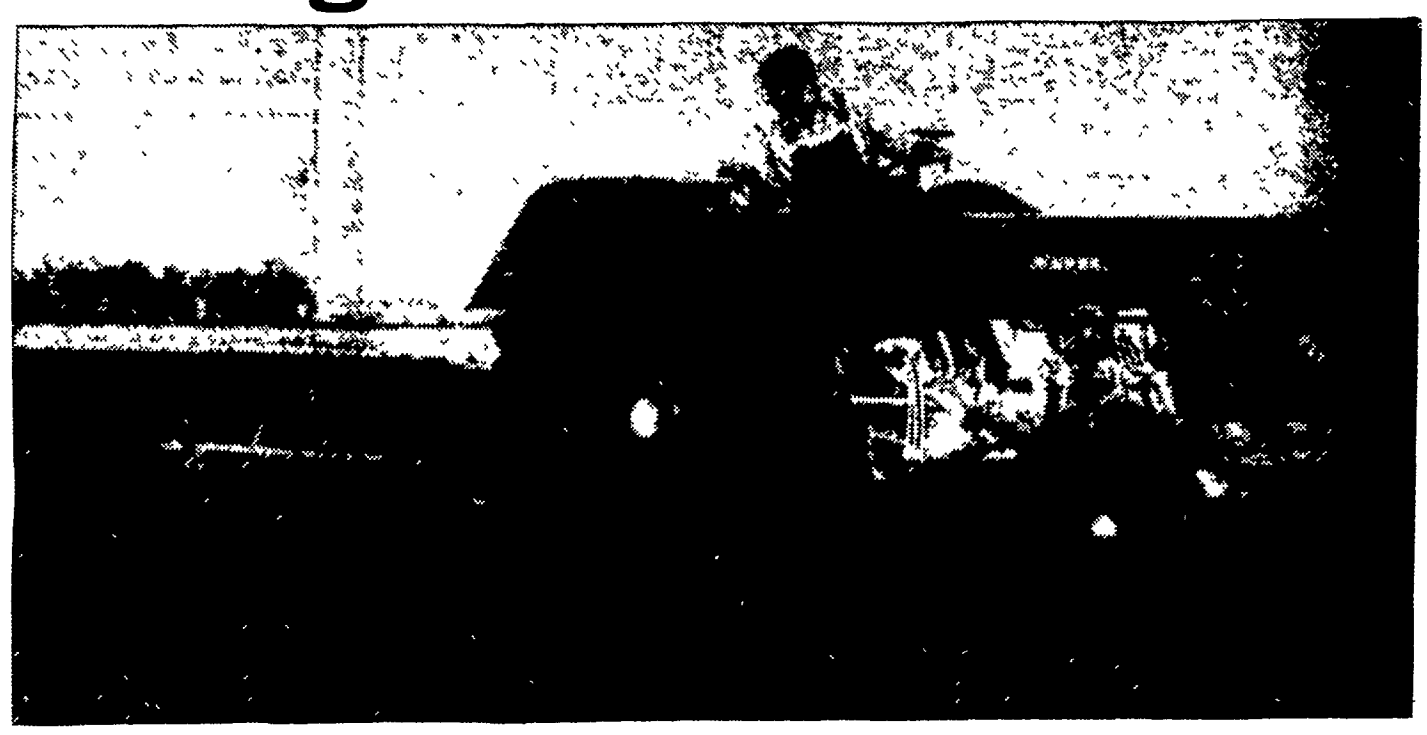
Fulton Junior Grange #343 held their regular meeting Monday and had a large attendance. They will conduct a paper drive at their next meeting, March 9 and request contributions.

Mr. and Mrs. Walter Martin, Drumore, will show colored pictures of their recent trip to Morocco at the next meeting of Fulton Grange #66 on February 23.

Cancer Puzzle

Breast cancer is the leading cause of cancer death among American women. Yet it is rare among Japanese women Why? That's part of the cancer puzzle American Cancer Society research seeks to solve

what's a foreign tractor doing on American soil?



plenty, if it's DEUTZ

(pronounced DOYTZ)

here's what makes DEUTZ the world's finest tractor!

DEUTZ AIR-COOLED DIESEL ENGINE — NO RADIATOR — NO RADIATOR PROBLEMS

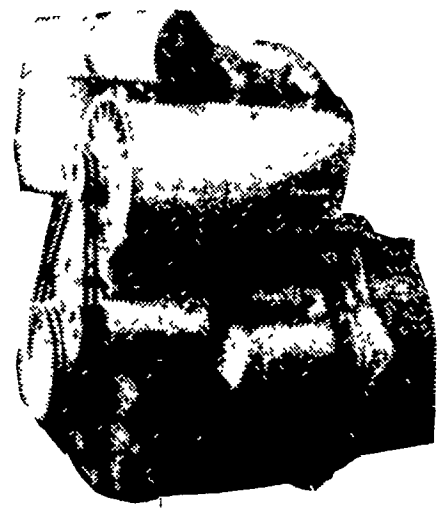
Complete warm-up in 30 seconds Operates trouble-free in both hot and cold weather extremes.

PRECISION BUILT BY WEST GERMAN CRAFTSMEN

DEUTZ is the original builder of internal combustion engines, and The DEUTZ engine is machined to perfection — so fine it does not need or use cylinder head gaskets

FULL RANGE OF MODELS 25 TO 85 HORSEPOWER

DEUTZ Diesel Tractors are built in six different power sizes with model option variations to fit every job requirement.



LOW FUEL CONSUMPTION

Have you ever seen a diesel that didn't smoke? Come see a DEUTZ! Smoke represents unburned fuel which means loss in fuel economy With a smoke-free DEUTZ, you are assured of maximum fuel savings

MOST ADVANCED HYDRAULIC SYSTEM IN THE WORLD

Features include position control, depth and draft control, float and flow control, multiple remote control valves, and 3 point linkage

TESTED AND PROVEN ON AMERICAN FARMS

Before United States distribution began, ten DEUTZ Tractors were use-tested on American farms Tractors were worked for as much as 1,000 hours each during a two year period without a single part replacement on any of the tractors other than oil and air filters

and the price? you simply won't believe it!

Homemakers Of Tomorrow Announced

Winners in area schools in the 1970 Betty Crocker Search for the American Homemaker of Tomorrow have been announced

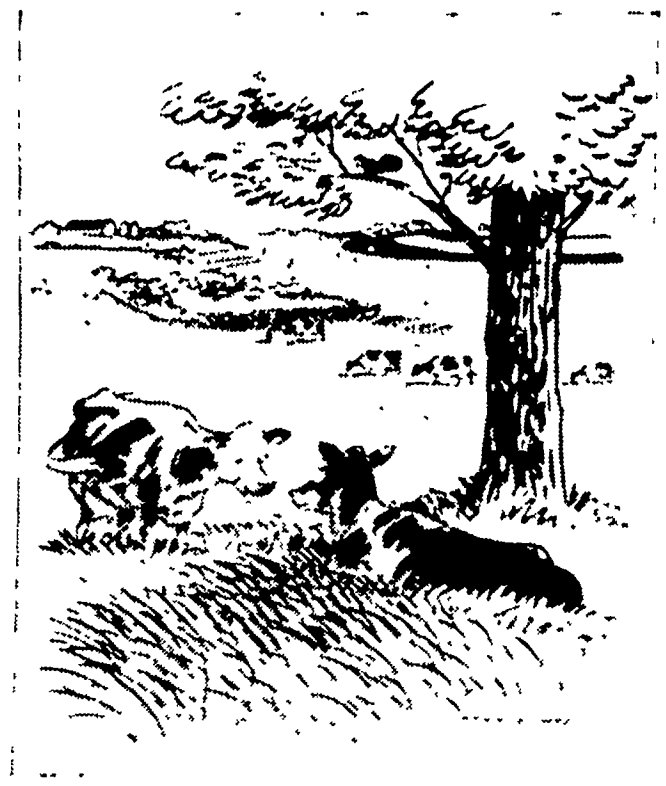
They are Linda L Hedricks, Conestoga Valley; Susan Simpson, Lancaster Catholic; Linda E. Thompson, McCaskey; Carol L. Demmy, Ephrata; Melissa A Delong, Hempfield; Eileen Joyce Good, Warwick; Carol J. Hostetter, Penn Manor; Donna Robinson, Donegal; Diane Ellen Triman, Manheim Township; Pamela L. Daughton, Solanco; Jane E. Bailey, Eastern High School, Wrightsville, and Virginia L Corotto, Lampeter-Strasburg.

Selected on the basis of their scores in a Dec 2 homemaking knowledge and attitudes examination for which a record 646,041 senior girls in 15,040 of the nation's high schools were enrolled the young women are now eligible for state and national honors. Each will also receive a specially designed silver charm.

The State Homemaker of Tomorrow will be named in March She will be awarded a $1,500 college scholarship, with the second-ranking girl in the state receiving a $500 educational grant

Additionally, first-place winners from the 51 states and the District of Columbia, together with advisors from their schools will receive an expense-paid educational tour of Washington D C , and Colonial Williamsburg, Va , this spring

Conservation Corner



"We've got it made — plenty of grass, water and shade."

Holstein Registration From Artificial Insemination Lower

Brattleboro, Vt — For the second year in a row, Holstein-Friesian registrations of artificially conceived animals have decreased This announcement was made by Robert M. Stebbins, Superintendent of the Registry Department of Holstein-Friesian Association of America as a part of the Association's annual report of activities for 1969

Stebbins stated that 68 4% of all Holstein registrations during the past year were of animals that were artificially conceived through one of several categories of insemination by artificial means This compares with 69 4% of the Holstein registrations in 1968 and the all time high of 70 5% in 1967 Holstein registrations of A I conceived animals has exceeded 68% of total Holstein registrations since 1965

A total of 261,144 Holsteins were registered by the Association during 1969 Of this number, 178,528 were artificially conceived Most of the conceptions were the result of services provided Holstein dairymen by established bull studs or semen producing businesses This accounted for 61 76% of the Holstein registrations The remaining number resulted from breedings between established breeder-herds and within the herd of the owner of the sire and dam

The five year level of 68% to 70% of registrations of artificially conceived animals suggests that this might be the leveling off point within the purebred Registered Holstein sector of the dairy industry Although no specific information is available, it is believed that the remaining 30% of the registrations of naturally conceived animals is composed primarily of the offspring of first calf heifers

AGWAY

Prime

EVERY TIME

That's the kind of VEAL you can produce on the Agway-Provimi program

The growing demand for quality veal represents a new and exciting opportunity for Agway members to make money. Raising vealers is an ideal program that will fit into most any dairy and crop farm operation. Here's why:

- ☐ Rearing veal calves requires relatively little time and labor.
- ☐ The work is light.
- ☐ The investment is modest.
- ☐ The need for equipment is limited.
- ☐ With good housing and management, risk is relatively low.
- ☐ And with the Agway-Provimi Program you will be assured of premium-quality veal and, with it, premium prices.

PROVIMI . . . the symbol of top quality in the veal-producing industry
